Prabhavit Gupta

AI Solutions Delivery Lead / Forward Deployed Engineer

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (Remote)

Summary

Forward Deployed Engineer and AI specialist who bridges the gap between core engineering and customer success by deploying generative-AI solutions into production. I specialize in architecting LLM integrations, building robust AI orchestration pipelines, and embedding custom solutions directly into client environments. My daily toolkit includes Python, TypeScript, REST/GraphQL APIs, Claude and OpenAI APIs, and rapid prototyping frameworks for fast iteration.

Skills

- **AI & Orchestration:** LLM APIs (Claude, OpenAI), agentic pipelines, RAG, prompt engineering, LLM data extraction, evaluation, automated failure recovery, n8n.
- **Core Engineering:** Python, TypeScript, JavaScript, Node.js, PostgreSQL, Supabase, REST/GraphQL APIs, webhooks, Docker, Git.
- **Customer Deployment & FDE:** Third-party API integrations, CRM and GTM automation, client requirement translation, architecting client solutions, production operations, human-in-the-loop systems.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI pipeline (TypeScript, n8n, Claude) that drafts workspace listings from unstructured brochures and photos, integrating human-in-the-loop review to ensure production-level quality. Processed 900+ live listings.
- Deployed autonomous support agents that answer customer queries against live platform databases, featuring a confidence-based escalation logic to human operators.
- Architected and shipped direct integrations with client APIs (OfficeRnD, Nexudus) for automated marketplace bookings and managed CRM routing.
- Managed the migration of a live marketplace off a legacy stack to a modern Next.js/PHP backend, handling the scaling from 2,000 to 4,500+ users seamlessly.

UltraStrategy.com **Dec 2024 – May 2025**
AI Automation Developer (Freelance) *France (Remote)*

- Built a robust backend parsing service leveraging LLMs for unstructured data extraction.
- Engineered a unified database schema, managed API rate limits, scaling bottlenecks, and developed reliable error fallback mechanisms for production use.

Urlink **Apr 2025 – Jul 2025**
Project Manager & AI Developer (Freelance) *Barcelona, Spain (Remote)*

- Led client delivery cycles, translating business requirements into scalable backend logic and client-driven automations.
- Built and shipped the core platform using Next.js and Supabase, ensuring fast iteration and high client satisfaction.

Get2Germany.com **Jan 2024 – May 2024**
Backend & Automation Specialist (Part-time) *Berlin, Germany (Remote)*

- Integrated Google APIs to build custom AI tools and data aggregation systems.
- Optimized the database schema to handle high-frequency searches, significantly reducing query response times.

Education

Ca' Foscari University of Venice Oct 2020 – Jun 2024
BA Philosophy, International Studies & Economics (Minor: Entrepreneurship)

Work authorization: European Long Term Residence Permit (Italy); available immediately. No sponsorship required. **Languages:** Hindi (native), English (professional C2), Italian (conversational).
