## Profile

Backend Software Engineer with deep expertise in designing scalable, high-traffic distributed systems and enterprise APIs. Proven track record of architecting cloud-native platforms, orchestrating robust microservices, and leading full-stack migrations. Adept at complex data modeling (ORMs, SQL) and ensuring system reliability. Quick learner equipped with modern AI tooling (Claude Code) to rapidly onboard into Java, Kotlin, and Spring Framework ecosystems. Passionate about tackling large-scale e-commerce challenges and driving platform efficiency.

## Core Competencies

- **Backend & Systems:** Microservices architecture, REST APIs, System Design, High-Traffic Scaling, Performance Tuning
- **Languages & Frameworks:** TypeScript, Node.js, Python; rapid adaptation to Java, Kotlin, and Spring Framework
- **Data & Modeling:** ORMs, SQL (Supabase), robust data modeling, caching (Redis concepts), event-driven queues (Kafka concepts)
- **Cloud & Infrastructure:** Docker, Kubernetes, CI/CD pipelines, Observability, Cloud-Native Deployments

## Professional Experience

**FlowSpace.co** **London, UK (Remote)**

*Lead Backend Developer (Freelance)* *Mar 2024 - Present*

- Architected and deployed scalable, asynchronous backend services that process large-scale enterprise data, ensuring fault-tolerant performance and data integrity.
- Led the end-to-end migration of a live platform from a legacy stack to a cloud-native architecture, optimizing resource management and successfully scaling to support 4,500+ active users.
- Engineered complex REST API integrations with external systems (OfficeRnD, Nexudus), establishing robust microservice communication and automated pipelines.
- Owned the infrastructure lifecycle from design to production support, implementing modern CI/CD practices and containerization for seamless deployment.

**Urlink** **Barcelona, Spain**

*Project Manager & Backend Developer (Freelance)* *Apr 2025 - Jul 2025*

- Delivered a robust cloud-native platform leveraging Supabase (SQL) and advanced backend logic to execute complex, multi-tenant client automations and data workflows.
- Acted as the technical authority working directly with stakeholders, successfully translating business requirements into scalable architectural designs.

**UltraStrategy.com** **France**

*Backend Automation Engineer (Collaborator)* *Dec 2024 - May 2025*

- Designed and deployed a robust data-parsing pipeline operating within a modern data ecosystem, handling complex extraction logic and ensuring high throughput for large-scale data processing.

**Get2Germany.com** **Berlin, Germany**

*Lead Developer & Integration Specialist* *Jan 2024 - May 2024*

- Integrated third-party APIs and built robust automation workflows utilizing n8n to streamline enterprise operations and inter-system communications.

**Clubee.com** **Foetz, Luxembourg**

*Full-Stack Developer & QA (Freelance)* *Sep 2023 - Aug 2024*

- Implemented REST API endpoints, developed core backend management tools, and enforced production-grade quality through rigorous unit testing and system QA.

## Education

**Ca' Foscari University of Venice** **Venice, Italy**

*BA Philosophy, International Studies & Economics* *Oct 2020 - Jun 2024*

Minor in Entrepreneurship

## Certifications & Languages

**Work Authorization:** European Long Term Residence Permit (Italy). Open to relocation to Seoul, South Korea.
**Languages:** English (Professional), Hindi (Native), Italian (Beginner).
