Prabhavit Gupta

Data Engineer: Modern Data Platforms, Ingestion Pipelines & AI Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Data Engineer who builds automated data pipelines, relational data architectures, and ingestion workflows that transform multi-format, unstructured inputs into production data assets. At FlowSpace, led the core platform and data migration from a legacy architecture to modern PostgreSQL and Laravel schemas, engineered an automated ingestion pipeline processing 900+ entities with data quality validation, and deployed live query agents on transactional databases. Daily tools are Python, SQL, TypeScript, Docker, and REST APIs.

Skills

- **Data Pipelines & Integration:** ETL/ELT pipelines, multi-format data ingestion (PDF, spreadsheet, web to structured JSON/relational schemas), data quality and validation, event-driven workflows, n8n, automated error recovery, REST APIs, webhooks
- **Data Architecture & Storage:** PostgreSQL, MySQL, Supabase, NoSQL, relational data modeling, schema migration, Modern Data Platform principles, DWH concepts, familiarity with Lambda/Kappa and Data Mesh architectures
- **Languages, Tools & AI Systems:** Python, SQL, TypeScript, JavaScript, Docker, Git, CI/CD; familiar with Apache Spark and Kafka; RAG vector pipelines, LLM-driven structured extraction (Claude, OpenAI), AI agents querying live operational databases

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Lead Data & Full-Stack Engineer (Full-time, Freelance) *London, UK (remote)*

- Led the core data migration off a legacy architecture to a modern PostgreSQL, Next.js and Laravel stack, executing entity-level mapping and automated cutover scripts while scaling from 2,000 to 4,500+ active users.
- Architected an automated data ingestion pipeline (TypeScript, n8n, Claude API) extracting, normalizing, and validating multi-format inputs (PDFs, spreadsheets, web feeds) into structured schemas (900+ listings processed).
- Engineered bidirectional REST API integrations and webhook pipelines with OfficeRnD and Nexudus for automated booking synchronization and data consistency.
- Deployed AI support agents querying live transactional records with confidence scoring and automated human escalation.

Get2Germany.com **Jan 2024 – May 2024**
Developer & Automation Specialist (Part-time) *Berlin, Germany*

Engineered automated data collection workflows in n8n, integrated Google APIs, and optimized database queries and schema performance.

Clubee.com **Sep 2023 – Aug 2024**
Developer & QA (Full-time, Freelance) *Foetz, Luxembourg*

Integrated Clubee REST APIs across platforms, developed data validation suites and federation dashboard tools, and conducted QA verification.

Tractionboard.co **Aug 2023 – Oct 2023**
Developer (Internship) *Utrecht, Netherlands*

Integrated OpenAI and SendGrid APIs for automated data processing, implemented responsive data views, and resolved production bugs.

Selected Projects

- **Urlink** (2025), Project Manager & Developer. Modeled PostgreSQL schemas on Supabase, designed platform business logic, and automated client data synchronization workflows. Stack: Next.js, Supabase, Netlify.
- **UltraStrategy** (2024 to 2025), AI Automation Developer. Built an automated document-parsing ETL pipeline using n8n and Eden AI for multi-source data extraction into structured candidate profiles.
- **LLM Document Parser** (Open Source), Creator. Engineered a public pipeline parsing semi-structured and unstructured documents into strictly validated JSON schemas.

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024)

Education

Ca' Foscari University of Venice Oct 2020 – Jun 2024
BA Philosophy, International Studies & Economics (Minor: Entrepreneurship)

Work authorization: European Long Term Residence Permit (Italy); available immediately. **Languages:** Hindi (native), English (fluent / C2), Italian (conversational).
