(Open to Remote)

Summary

Senior backend engineer focused on building transaction-heavy, highly resilient systems with strong data consistency. I architect scalable APIs and integrate robust database models (PostgreSQL) handling concurrent user updates. Proven track record leading major platform migrations and deploying automated, event-driven architectures to process critical business logic end-to-end.

Skills

- **Backend & Architecture:** RESTful & GraphQL APIs, Event-Driven Architecture, Microservices, System Scaling, Data Modeling, Transaction Management, Eventual Consistency concepts
- **Languages & Frameworks:** TypeScript, Python, Node.js, PHP (Laravel), Go (Familiar)
- **Databases & Infrastructure:** PostgreSQL (Optimization & Scaling), Redis, SQL, Cloud Infrastructure (AWS/GCP basics)
- **Tooling & QA:** Git, GitHub Actions, Postman, CI/CD, Unit Testing

Experience

FlowSpace.co **Mar 2024 – Present**
Lead Backend Developer *London, UK (remote)*
Architected scalable backend infrastructure for a B2B workspace marketplace handling critical booking data.

- Led the core platform migration to a scalable Next.js and Laravel (PHP) architecture, supporting user growth from 2,000 to 4,500+ users.
- Designed and optimized relational database schemas (PostgreSQL) to ensure high data integrity for critical workspace booking transactions.
- Built and maintained clear, extensible RESTful APIs to support frontend applications and third-party integrations (OfficeRnD, Nexudus).
- Implemented event-driven workflows for automated CRM lead capture, routing, and booking confirmations.
- Engineered an automated data ingestion pipeline ensuring data consistency across multiple formats and concurrent user updates.

Urlink **Apr 2025 – Jul 2025**
Backend Project Manager (Freelance) *Barcelona, Spain*

- Built a robust backend platform with Supabase and Edge Functions to handle automated client workflows.
- Architected secure data models for multi-tenant users, optimizing database read/write latency.

UltraStrategy.com **Dec 2024 – May 2025**
Backend & Data Engineer *France*

- Developed data processing APIs and a scalable backend platform serving various enterprise user profiles.
- Integrated complex third-party AI APIs (Eden AI) with custom data pipelines for massive document parsing.

Get2Germany.com **Jan 2024 – May 2024**
Backend Developer *Berlin, Germany*

- Optimized the core PostgreSQL database, significantly reducing query latency for a large user base searching courses and jobs.
- Built integrations with Google APIs to construct a seamless, reliable experience for clients.
