Professional Summary

Generative AI Engineer with 5+ years of experience in ML/DL and 2+ years specialized in GenAI and LLM solution development. Proven track record of implementing end-to-end RAG systems, AI agents, and NLP chatbots in production environments. Strong expertise in AWS deployment and utilizing state-of-the-art models including OpenAI, Gemini, Claude, Llama, and Mistral.

Technical Skills

- **Generative AI & LLMs:** OpenAI, Gemini, Claude, Llama, Mistral, RAG, AI Agents, Prompt Engineering
- **Model Training & Optimization:** Fine-tuning, PEFT/LoRA, Quantization, Hugging Face, Transformers
- **Frameworks & Libraries:** LangChain, LlamaIndex, PyTorch, TensorFlow, Scikit-learn
- **Vector Databases:** ChromaDB, FAISS, Pinecone, Qdrant
- **Languages & Cloud:** Python, SQL, AWS (SageMaker, EC2, Bedrock), Docker, Git

Professional Experience

Generative AI Engineer *Remote*
Freelance / Independent Projects *2022 – Present*

- Designed and deployed live GenAI project implementations, including enterprise knowledge-search RAG platforms utilizing LangChain, FAISS, and OpenAI APIs.
- Developed and fine-tuned open-source LLMs (Llama, Mistral) using PEFT/LoRA to achieve custom NLP tasks while reducing compute requirements.
- Built multi-turn AI chatbots and Agentic AI workflows capable of autonomous tool execution and data synthesis.
- Architected end-to-end ML solutions and deployed them on AWS utilizing scalable architectures.

Machine Learning Engineer *Venice, Italy*
AI Consulting Solutions *2019 – 2022*

- Developed deep learning models for NLP and computer vision using PyTorch and TensorFlow.
- Preprocessed and managed large-scale datasets, improving model accuracy by 15%.
- Collaborated with cross-functional teams to integrate ML microservices into existing client architectures.

Education

Master of Science in Computer Science *University Name*
Specialization in Artificial Intelligence and Machine Learning *Graduation Year*
