Prabhavit Gupta

Software Engineer – Backend & Cloud Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice / Milan, Italy

Summary

Product-minded Software Engineer with over 3 years of experience architecting and operating scalable, high-reliability microservices and SaaS platforms. Adept at applying object-oriented design and test-driven development (TDD) to build resilient APIs and data pipelines using PostgreSQL. Passionate about system reliability and integrating modern web technologies (JavaScript/TypeScript, HTML, CSS). Highly adaptable to Java, Kotlin, and .NET ecosystems, leveraging AI-powered development tools to accelerate learning, enforce engineering standards, and elevate code quality in fast-paced, cross-functional agile teams.

Skills

- **Backend & Architecture:** Microservices architecture, RESTful APIs, OOP principles, system reliability, transactional consistency, event-driven integrations
- **Languages & Frameworks:** TypeScript, Node.js, Python, Object-Oriented paradigms (adaptable to Java/C#), PHP (Laravel), Next.js, HTML, CSS, JavaScript
- **Cloud & Infrastructure:** Cloud deployments (AWS), Docker, CI/CD, scalable SaaS architecture, uptime monitoring
- **Databases:** PostgreSQL, Supabase, database schema design, entity pipelines, strict schema validation
- **Engineering Practices:** Test-driven development (TDD), agile methodologies, AI-assisted coding for rapid feature iteration and root-cause analysis

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & Backend Engineer (Full-time, Freelance) *London, UK (Remote)*

- Led the core SaaS platform migration to a scalable architecture, designing resilient PostgreSQL database schemas and handling complex user data while scaling the user base from 2,000 to 4,500+.
- Engineered and operated production REST APIs integrating third-party platforms with robust schema validation, error handling, and uptime monitoring for high reliability.
- Implemented strict test-driven engineering standards and CI/CD pipelines, extensively leveraging AI-powered tools to accelerate delivery and ensure system health.
- Architected and deployed an end-to-end AI ingestion pipeline extracting structured data from unstructured multi-format sources, enforcing data integrity essential for enterprise applications.

UltraStrategy.com **Dec 2024 - May 2025**
Backend Automation Developer (Collaborator) *France (Remote)*

- Developed a high-throughput data-processing pipeline using workflow automation and AI integrations, converting unstructured data into standardized relational schemas across diverse profiles.

Urlink **Apr 2025 - Jul 2025**
Project Manager & AI-Assisted Developer (Freelance) *Barcelona, Spain (Remote)*

- Directed technical requirements and built backend application logic, database structures, and client automations with a strong focus on AI-assisted development tools and modern web tech.

Get2Germany.com **Jan 2024 - May 2024**
Backend Developer & Automation Specialist (Part-time) *Berlin, Germany (Remote)*

- Built automated ETL pipelines integrating external APIs and custom workflows to aggregate, classify, and reliably serve complex domain data to front-end clients.

Education

Ca' Foscari University of Venice Oct 2020 - Jun 2024
BA Philosophy, International Studies & Economics (Minor: Entrepreneurship) Venice, Italy
Core focus: Analytical logic, quantitative decision theory, economic modeling, and technology innovation.

Work Authorization: European Long Term Residence Permit (Italy); full Italian and EU work rights with zero sponsorship required.
Languages: English (fluent C2), Italian (conversational), Hindi (native).
