Summary

Process Automation Engineer who builds secure, reliable automations that eliminate manual overhead across mission-critical business environments. At FlowSpace I built automated data pipelines and integration bots: I orchestrated an automated document processing pipeline handling diverse source formats through structured extraction and validation gates into production databases. I built custom API connectors and sync routines (OfficeRnD, Nexudus via OAuth2 and webhooks), optimized complex database queries in PostgreSQL and MySQL, and deployed enterprise workflow automations using Python, n8n, and Microsoft Power Automate. Certified in Microsoft Power Automate and Tray.AI, experienced in bridging client workflow requirements into resilient production code. Based in Italy, European Long Term Residence Permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
