Lead Developer & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Led the end-to-end data and platform migration off a legacy stack to a modern architecture (Next.js, Laravel, PostgreSQL), mapping data entities, resolving relational conflicts, and scaling active users from 2,000 to 4,500+ with zero downtime.
- Designed and shipped an automated AI ingestion pipeline (Claude, TypeScript, n8n) extracting structured data from unstructured multi-format brochures (PDF, spreadsheet, image, web) with human-in-the-loop review; 900+ listings drafted.
- Engineered bidirectional REST API and webhook integrations with customer platforms (OfficeRnD, Nexudus) and CRM pipelines, handling rate limits, payload validation, and automated synchronization.
- Deployed conversational support agents querying live platform records with confidence scoring and deterministic fallback to human specialists, while resolving complex customer technical issues end to end.
