Summary

Systems and Validation Engineer specialized in Computerized System Validation (CSV), data integrity compliance, and automated process qualification. At FlowSpace I established structured validation and testing protocols for production data pipelines and multi-system integrations: I drafted technical requirement specifications (URS), test scripts, and change control procedures adhering to rigorous data governance and auditability standards. I managed end-to-end API integrations and analytics reporting platforms (OfficeRnD, Nexudus, Stripe), executed qualification runs, and resolved deviations through root-cause analysis. Experienced in cross-functional collaboration with QA, software vendors, and operations teams to sustain systems in a verified, compliant state. Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
