Profile

Forward deployed software engineer experienced in embedding with teams and customers to translate complex business challenges into production-ready AI solutions. Proven track record in Python development, orchestrating multi-step LLM agents, deploying scalable architectures, and establishing robust CI/CD pipelines. Adept at bridging the gap between technical execution and strategic business goals to deliver high-impact integrations.

Core Competencies

- **Software & API Integration:** Python, TypeScript, REST API design, robust backend architecture, CI/CD, Docker, GitHub Actions, complex system integrations.
- **AI & Agentic Systems:** LLM integration, tool use, multi-step agent orchestration, structured output parsing, RAG pipelines, OpenAI API, Anthropic API.
- **Customer Execution:** Embedded customer collaboration, translating ambiguous requirements into technical architecture, end-to-end project ownership, schema validation.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Forward Deployed AI Engineer (Freelance) *Mar 2024 - Present*

- Embedded with business units to directly interface with stakeholders, bridging domain requirements with technical execution to drive product adoption.
- Built and deployed an AI listing pipeline orchestrating multi-step LLM agents with Python-based tool use to ingest diverse document formats and push validated data to production.
- Designed human-in-the-loop workflows with strict schema validation, empowering non-technical users to securely review AI outputs before deployment.
- Drove the full-stack migration of a legacy platform to a scalable Next.js and Laravel architecture, supporting user growth from 2,000 to over 4,500.
- Integrated third-party APIs, booking systems, and CRMs, resolving complex architectural challenges for end-to-end reliability.
