Prabhavit Gupta

+39-351-610-7807 prabhavitg@gmail.com Linkedin Venice, Italy

Career Summary

- IoT Platform & Systems Integration Engineer with dual degrees in Mechanical Engineering and Management Engineering (Politecnico di Milano).
- Solid foundation in architecting and operating industrial IoT platforms, bridging manufacturing shop-floor assets (OT) with enterprise cloud applications (IT).
- Extensive hands-on experience implementing MQTT message brokers, OPC UA servers/clients, Modbus protocols, and real-time streaming pipelines.
- Proficient in dashboard engineering and metrics visualization using Grafana, Prometheus, and Elasticsearch, paired with automated Python edge services.

Technical Skills

- **IoT Protocols & Connectivity** – MQTT (EMQX, Mosquitto), OPC UA, Modbus TCP/RTU, WebSockets, REST APIs, Webhooks, HTTP/2
- **IT/OT Convergence & Architecture** – Edge Gateways, Fieldbus Integration, Industrial Ethernet, Network Segregation, Microservices
- **Observability & Visualization** – Grafana, InfluxDB, Prometheus, Elasticsearch, Logstash, Kibana (ELK), Time-Series Data Modeling
- **Software & Scripting** – Python, TypeScript, Bash, SQL, NoSQL (MongoDB, Redis), Docker, Linux, Git, CI/CD
- **Methodology & Tools** – Agile/Scrum, Atlassian Suite (Jira, Confluence), Technical Runbooks, Incident Troubleshooting

Visa & Language

- **Language** – English (Fluent / Professional), Italian (Conversational / Intermediate), Hindi (Native)
- **Work Authorization** – European Long Term Residence Permit (No Visa Sponsorship required). Driving License (Patente B). Available for Bologna hybrid schedule.

Professional Experience

FlowSpace.co — *IoT Platform & Integration Lead*
London, UK / Remote — *Mar 2024 – Ongoing*

- **IoT Platform Architecture & Data Pipelines:**
  - Architected high-throughput telemetry ingestion services utilizing MQTT and WebSockets, routing streaming machine metrics to backend data stores.
  - Built real-time monitoring dashboards in Grafana tracking connected device status, signal latencies, and payload throughput across distributed deployments.
  - Integrated edge hardware with central cloud microservices via secure REST endpoints and containerized gateway proxies.
- **System Reliability & Agile Collaboration:**
  - Coordinated cross-functional sprint deliveries following Agile workflows across Jira and Confluence, accelerating release cadence.
  - Maintained 99.9% uptime across telemetry collectors through automated alerting, failover routines, and continuous health probes.
- *Tools: MQTT, OPC UA, Grafana, Python, Docker, Linux, NoSQL, Git, Jira*

Urlink — *Systems Automation Engineer*
Milan, Italy — *Jul 2023 – Feb 2024*

- Configured industrial IoT edge gateways to extract machine state parameters from PLCs over Modbus and OPC UA.

- Integrated field sensors into centralized operational databases, validating data integrity during client plant commissioning.
- Drafted protocol configuration documentation, interface mapping tables, and network troubleshooting checklists.

UltraStrategy *Automation Developer*
Remote, Germany *Sep 2022 – Jun 2023*

- Developed Python automation scripts extracting operational time-series data from connected sensors and machinery.
- Designed automated reporting pipelines summarizing daily production throughput and sensor deviation alerts.

Education

Politecnico di Milano *M.Sc. in Management Engineering (Digital Business & ICT)*
Milan, Italy *2020 – 2023*

Thapar Institute of Engineering and Technology
B.E. in Mechanical Engineering
Punjab, India *2014 – 2018*
