Forward Deployed AI Engineer combining full-stack development with hands-on AI integration to ship production-ready solutions. Proven track record of leveraging Python and LLMs to translate complex client requirements into scalable automated workflows. Experienced in managing stakeholder communication and owning the product lifecycle from scoping to production deployment in client environments.

Core Competencies

- **AI & ML Integration**: Python, LLMs, RAG, Agentic Workflows, OpenAI/Claude APIs, Prompt Engineering
- **Software Engineering**: Python, TypeScript, Next.js, Node.js, REST APIs, Webhooks, SQL
- **Data & Cloud**: Postgres, Supabase, Cloud platforms (AWS/GCP), Multi-format Parsers (PDF, Web, Image)
- **Stakeholder Collaboration**: End-to-end delivery, requirements gathering, cross-functional client integration

Professional Experience

FlowSpace.co **London, UK (Remote)**

Lead Developer *Mar 2024 - Aug 2026*

- Led the live-product migration from a legacy stack to a modern architecture, scaling the platform from 2,000 to over 4,500 active users.
- Designed and deployed a production AI listing bot using Python, TypeScript, and Claude to ingest multi-format brochures and autonomously draft listings with human-in-the-loop review.
- Built and embedded support AI agents against live production data, implementing confidence-based human escalation to resolve customer queries efficiently.
- Shipped full-stack automations and API integrations, operating directly with external agencies to ensure robust delivery.

Urlink **Barcelona, Spain**

Project Manager & AI-Assisted Developer *Apr 2025 - Jul 2025*

- Delivered a full-stack platform utilizing AI-assisted development tools, directly translating client requirements into scalable business logic.

UltraStrategy **France**

AI Automation Developer *Dec 2024 - May 2025*

- Engineered an automated CV-parsing LLM pipeline utilizing Python and Eden AI for precise data extraction and structured JSON output.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Built AI tools and automated pipelines integrating external APIs to aggregate and rank professional opportunities, optimizing database performance.

Independent Projects

- **LLM Document Parser**: Open-source production pipeline converting unstructured documents into typed JSON schemas (github.com/prab-gupta/llm-doc-parser).

Education & Certifications

Ca' Foscari University **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

- **Certifications**: Microsoft Copilot Studio Agent Academy (Building AI agents)
