Profile

Fullstack Forward Deployed AI Engineer with a strong background in TypeScript, Python, and cloud infrastructure. Experienced in bridging the gap between core engineering and customer success by architecting and delivering custom AI solutions directly to clients. Proven ability to integrate LLM workflows and enterprise SaaS products rapidly into existing environments.

Experience

Freelance / Independent **Remote**
Forward Deployed AI Engineer *2022–Present*

- Architected and integrated custom LLM-based solutions for enterprise clients using TypeScript, Python, and cloud platforms (AWS/GCP).
- Collaborated directly with customer teams to translate complex business requirements into scalable, production-ready AI workflows.
- Developed scalable fullstack web applications bridging backend AI orchestrations with intuitive frontends using modern TypeScript frameworks.
- Shipped production code in days by leveraging agile development cycles and continuous integration.

Various Clients **Milan, Italy**
Software Engineer *2019–2022*

- Built and maintained robust REST/GraphQL APIs and integrated enterprise data systems.
- Led cross-functional initiatives to deploy custom integrations in client environments.
- Improved application performance and scalability through optimized SQL and cloud-native deployments.

Technical Skills

Languages: TypeScript, Python, SQL, JavaScript

Cloud & Ops: AWS, GCP, Azure, Docker, CI/CD

AI & Frameworks: LLM APIs, AI Orchestration frameworks, Node.js, React

Other: REST/GraphQL APIs, Client Communication, Requirement Translation

Education

Example University
BSc Computer Science *2015–2019*
