Prabhavit Gupta

+39-351-610-7807 prabhavitg@gmail.com Linkedin Venice, Italy

Career Summary

- Service Integration & Technical Operations Engineer with dual degrees in Mechanical and Management Engineering (Politecnico di Milano).
- Hands-on expertise in deploying, integrating, and troubleshooting distributed service platforms across hybrid cloud and Linux server environments.
- Proficient in service automation, script development (Python, Bash), API/microservices integration, and centralized observability (ELK, Prometheus, Grafana).
- Experienced in driving pre-production validation, production readiness reviews, root cause analysis (RCA), and multi-vendor technical operations.

Technical Skills

- **System Integration & Operations** – Service Deployment, Production Readiness Validation, Incident Management, Root Cause Analysis (RCA), Multi-Vendor Integration
- **OS & Systems Administration** – Linux (Debian, Ubuntu, RHEL), Systemd, Troubleshooting, Package Management, Shell Scripting (Bash)
- **Networking & Security** – TCP/IP, DNS, Routing, Firewalls, VPN, SSL/TLS, Reverse Proxies (Nginx, Envoy), Load Balancing
- **Containers & Cloud** – Docker, Container Orchestration, Microservices, REST APIs, Webhooks, CI/CD Pipelines (GitHub Actions)
- **Scripting & Automation** – Python, Bash, Ansible Fundamentals, SQL, JSON/YAML, Git, Technical Documentation & Runbooks
- **Monitoring & Observability** – Log Analysis, Elasticsearch / ELK Stack, Grafana, Metrics Telemetry, Anomaly Detection

Visa & Language

- **Language** – English (Fluent / Professional), Italian (Conversational / Intermediate), Hindi (Native)
- **Work Authorization** – European Long Term Residence Permit (No Visa Sponsorship required). Driving License (Patente B). Available for on-site role in Milan.

Professional Experience

FlowSpace.co — *Service Integration & Technical Operations Lead*
London, UK / Remote — *Mar 2024 – Ongoing*

- **Platform Integration & Production Operations:**
  - Deployed, configured, and integrated distributed microservices across containerized Linux environments, sustaining 99.9% operational availability.
  - Managed pre-production validation testing, release staging, and live cut-overs for core customer-facing data pipelines.
  - Formulated standard operating procedures (SOPs), deployment runbooks, and incident triage playbooks for operational stakeholders.
- **Incident Troubleshooting & Diagnostic Automation:**
  - Conducted rapid root-cause analysis (RCA) on live operational anomalies using Elasticsearch and structured log tracing.
  - Developed Python and Bash automation utilities streamlining configuration validation, log aggregation, and recurring sysadmin checks.
- *Tools: Linux, Python, Docker, REST APIs, Bash, ELK Stack, Git, CI/CD*

Urlink — *Systems Automation Engineer*
Milan, Italy — *Jul 2023 – Feb 2024*

- Handled end-to-end integration and technical commissioning of networked field devices and central telemetry databases.
- Resolved network routing, interface communication timeouts, and protocol errors during customer acceptance testing.
- Authored technical integration manuals, hardware topology diagrams, and maintenance guidelines for client support engineers.

UltraStrategy *Automation Developer*
Remote, Germany *Sep 2022 – Jun 2023*

- Built automated monitoring routines tracking platform uptime, resource consumption, and service response latencies.
- Automated diagnostic data extraction, transforming multi-system error logs into structured weekly operational health reports.

Education

Politecnico di Milano *M.Sc. in Management Engineering (Digital Business & ICT)*
Milan, Italy *2020 – 2023*

Thapar Institute of Engineering and Technology
B.E. in Mechanical Engineering
Punjab, India *2014 – 2018*
