Backend Software Engineer specialized in high-performance distributed systems, API integrations, and event-driven architectures. At FlowSpace, I built and scaled backend architectures that orchestrate complex asynchronous workflows, handling high-throughput rate limits, and webhook retry logic to ensure fault tolerance. I am highly adaptable, leveraging AI-assisted workflows to rapidly master new tech stacks and frameworks. With a strong track record of building resilient, scalable systems, I am eager to bring my backend engineering expertise to KarrotPay's mission-critical payment infrastructure, ensuring stable and reliable fintech experiences.

Core Competencies

- **Backend & Infrastructure:** Python, TypeScript, Node.js, PostgreSQL, AWS, CI/CD. Proven ability to rapidly adapt to JVM-based environments (Kotlin, Spring Boot, gRPC).
- **Distributed Systems:** REST API design, event-driven architectures, webhooks, asynchronous job processing, fault tolerance, high-availability, Docker.
- **AI & Orchestration:** AI-assisted coding for accelerated development, multi-agent workflow design, LLM tool use.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & Backend Engineer *Mar 2024 - Aug 2026*

- Designed event-driven architectures integrating complex APIs, handling rate limits, webhooks, and retry logic across service boundaries to serve high-throughput workloads with strict fault tolerance.
- Built and scaled data pipelines orchestrating multi-step integrations with asynchronous job processing, ensuring strong data consistency and system resilience.
- Migrated a legacy system to a modern stack (Next.js, PostgreSQL), optimizing database performance and scaling the active user base from 2,000 to over 4,500.
- Leveraged AI agents and AI-assisted coding workflows to significantly improve development velocity and maintain high code quality across the platform.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Integrated third-party APIs and built robust data extraction workflows, optimizing underlying PostgreSQL database performance for concurrent access and large-scale data processing.

Clubee.com **Foetz, Luxembourg**

Developer & QA *Sep 2023 - Aug 2024*

- Spearheaded the integration of the Clubee API, ensuring reliable system performance and data integrity in a highly distributed environment.

Independent Projects

UltraStrategy **Freelance**

Backend Developer *2024 - 2025*

- Built a scalable data extraction tool serving multiple user profiles, directly collaborating with stakeholders to translate requirements into deployed features.

Urlink **Freelance**

Project Manager & Backend Developer *2025*

- Led the end-to-end development of a platform, deploying client-driven automations, establishing secure data handling, and optimizing backend services.

Education

Ca' Foscari University of Venice **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor: Entrepreneurship. Developed strong logical thinking and a collaborative mindset.

Work authorization: EU Long Term Residence Permit (Italy). Open to relocation to Seoul, South Korea.
