Forward Deployed AI Engineer combining full-stack development with hands-on AI integration to ship production-ready agentic solutions. Proven track record of translating complex business requirements into measurable automated workflows, integrating LLMs, RAG, and multi-format data pipelines. Experienced in managing stakeholder communication and owning the entire product lifecycle from prototype to production.

Core Competencies

- **AI & ML Integration**: LLMs, Agentic Workflows, RAG, Claude/OpenAI APIs, n8n, Prompt Engineering
- **Software Engineering**: TypeScript, Next.js, Node.js, Python, Laravel, REST APIs, Webhooks
- **Data & Databases**: Postgres, Supabase, Data Extraction, Multi-format Parsers (PDF, Web, Image)
- **Stakeholder Collaboration**: End-to-end product ownership, requirements gathering, cross-functional delivery
- **Tools & QA**: GitHub, Postman, Playwright, Figma, Vercel

Professional Experience

FlowSpace.co **London, UK (Remote)**

Lead Developer *Mar 2024 - Aug 2026*

- Led the live-product migration from a legacy stack to a coded Next.js and Laravel architecture, successfully scaling the platform from 2,000 to over 4,500 active users.
- Designed and deployed a production AI listing bot utilizing n8n, Claude, and TypeScript to ingest multi-format brochures and autonomously draft workspace listings with human-in-the-loop review.
- Built and integrated support AI agents directly against live production data, implementing confidence-based human escalation to resolve customer queries.
- Shipped full-stack CRM automations and API integrations (OfficeRnD, Nexudus), actively collaborating with internal teams and external agencies to ensure robust delivery.

Urlink **Barcelona, Spain**

Project Manager & AI-Assisted Developer *Apr 2025 - Jul 2025*

- Delivered a full-stack platform (Next.js, Supabase) utilizing AI-assisted development tools, directly translating client requirements into scalable workflows and business logic.

UltraStrategy **France**

AI Automation Developer *Dec 2024 - May 2025*

- Developed an automated CV-parsing LLM pipeline utilizing n8n and Eden AI for precise data extraction and structured JSON output.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Built AI tools and automated pipelines integrating Google APIs to aggregate and rank professional opportunities, optimizing database performance.

Independent Projects

- **LLM Document Parser**: Open-source production pipeline converting unstructured documents into typed JSON schemas (github.com/prab-gupta/llm-doc-parser).

Education & Certifications

Ca' Foscari University **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

- **Certifications**: Microsoft Copilot Studio Agent Academy, Introduction to building AI agents
