Backend Software Engineer specialized in high-performance distributed systems, API integrations, and event-driven architectures. At FlowSpace, I designed complex asynchronous workflows, ensuring data integrity and transactional consistency—critical for systems managing high-throughput data processing. I am highly adaptable, leveraging AI-assisted workflows (Claude Code) to rapidly master new tech stacks and refactor legacy codebases. I have hands-on experience setting team standards for AI coding tools. With a strong track record of building resilient microservices, I am eager to bring my backend engineering expertise to Mycle, delivering stable mobility services and improving developer productivity in a Spring/Kotlin environment.

Core Competencies

- **Backend & Infrastructure:** Python, TypeScript, Node.js, PostgreSQL, AWS, Docker. Proven ability to rapidly adapt to JVM-based environments (Kotlin, Java, Spring) using advanced AI coding tools.
- **Distributed Systems:** REST API design, event-driven architectures (Kafka, SNS/SQS concepts), webhooks, asynchronous job processing, fault tolerance, data integrity, microservices.
- **AI & Orchestration:** AI-assisted coding (Claude Code) for accelerated development, defining AI workflows and standards for teams, legacy code refactoring and context building using LLMs.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & Backend Engineer *Mar 2024 - Aug 2026*

- Designed event-driven architectures integrating complex APIs, carefully managing transaction boundaries, webhooks, and retry logic to serve high-throughput workloads with strict fault tolerance.
- Built and scaled data pipelines orchestrating multi-step integrations, ensuring strong data consistency for critical workflows similar to reservation or settlement systems.
- Migrated a legacy system to a modern stack (Next.js, PostgreSQL), optimizing RDBMS schema and scaling the active user base from 2,000 to over 4,500 while improving DB performance.
- Leveraged AI agents (Claude Code) to navigate legacy contexts, automate repetitive tasks, and improve overall team velocity, setting a standard for effective AI tool usage.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Integrated third-party APIs and built robust data extraction workflows, optimizing underlying PostgreSQL database performance with custom SQL tuning for concurrent access.

Clubee.com **Foetz, Luxembourg**

Developer & QA *Sep 2023 - Aug 2024*

- Spearheaded the integration of the Clubee API, ensuring reliable system performance and data integrity in a highly distributed environment.
- Engaged in rigorous code reviews and test automation to maintain high quality standards.

Independent Projects

UltraStrategy **Freelance**

Backend Developer *2024 - 2025*

- Built a scalable data extraction tool serving multiple user profiles, actively questioning initial requirements to propose more efficient architectural solutions.

Urlink **Freelance**

Project Manager & Backend Developer *2025*

- Led the end-to-end development of a platform, deploying client-driven automations, establishing secure data handling, and optimizing backend cloud services.

Education

Ca' Foscari University of Venice **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor: Entrepreneurship. Developed strong logical thinking, critical analysis, and a collaborative mindset.

Work authorization: EU Long Term Residence Permit (Italy). Open to relocation to Seoul, South Korea.
