Backend & AI Automation Developer bridging the gap between high-performance systems and AI agent capabilities. At FlowSpace, I scaled multi-agent architectures that orchestrate API integrations, handle structured output, and automate complex workflows. I thrive in high-velocity startup environments, building scalable backend services (REST, asynchronous job processing) and leveraging AI-assisted coding workflows to optimize development velocity. With a strong track record of rapidly mastering new tech stacks, I am eager to bring my expertise in distributed systems and AI tooling to NodeReal's Web3 infrastructure.

Core Competencies

- **Backend & Infrastructure:** Python, TypeScript, Node.js, PostgreSQL, AWS, CI/CD. Proven ability to quickly adapt to new languages (e.g., Golang) and architectures.
- **Systems Engineering:** REST API design, event-driven architectures, webhooks, asynchronous job processing, rate-limit handling, Docker.
- **AI Agents & Orchestration:** Multi-agent workflow design, LLM tool use, structured output parsing, Retrieval-Augmented Generation (RAG), AI-assisted coding.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & AI Engineer *Mar 2024 - Aug 2026*

- Designed event-driven architectures integrating complex APIs, handling rate limits, webhooks, and retry logic across service boundaries to serve high-throughput workloads.
- Leveraged AI agents and AI-assisted coding workflows to significantly improve development velocity and maintain high code quality across the pipeline.
- Built and scaled an AI data pipeline orchestrating multi-step LLMs with tool use, structured output parsing, and RAG to ingest diverse documents.
- Migrated a legacy system to a modern stack (Next.js, PostgreSQL) and scaled the active user base from 2,000 to over 4,500.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Integrated third-party APIs and built data extraction workflows, optimizing underlying PostgreSQL database performance for concurrent access.

Clubee.com **Foetz, Luxembourg**

Developer & QA *Sep 2023 - Aug 2024*

- Spearheaded integration of the Clubee API across the frontend, ensuring reliable system performance in a highly distributed environment.

Independent Projects

UltraStrategy **Freelance**

AI Automation Developer *2024 - 2025*

- Built a scalable LLM data extraction tool serving multiple user profiles, directly collaborating with stakeholders to translate requirements into deployed features.

Urlink **Freelance**

Project Manager & AI Developer *2025*

- Led the end-to-end development of a Next.js and Supabase platform, deploying client-driven automations and optimizing backend services.

Education

Ca' Foscari University of Venice **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor: Entrepreneurship. Developed strong logical thinking and a collaborative mindset.

Work authorization: EU Long Term Residence Permit (Italy); available immediately. Open to Remote (Singapore/Hong Kong/Taiwan/Malaysia hubs).
