Prabhavit Gupta

+39-351-610-7807 prabhavitg@gmail.com Linkedin Venice, Italy

Career Summary

- Automation Engineer with dual degrees in Mechanical Engineering and Management Engineering (Politecnico di Milano), experienced in industrial process control and plant automation systems.
- Practical background in DCS architectures, SCADA supervision (AVEVA, Ignition), PLC hardware/software integration (Siemens, ABB, Rockwell), and industrial communications networks.
- Experienced in coordinating technical vendors, executing automation revamping projects, and ensuring high reliability across continuous process manufacturing operations.
- Strong expertise in sensor telemetry, automated parameter monitoring, diagnostic testing, and system maintenance for regulated chemical and industrial environments.

Technical Skills

- **Industrial Automation & DCS** – DCS Architectures (Emerson DeltaV concepts), SCADA Systems (AVEVA System Platform, Ignition), PLC Control Logic (Siemens TIA Portal, ABB, Rockwell)
- **Process Control & Networks** – Industrial Data Networks, Profinet, Modbus TCP/RTU, OPC UA, Fieldbus, Sensor Telemetry & Transmitters (Pressure, Flow, Temp)
- **Engineering & Project Execution** – Automation Project Management, Vendor Technical Coordination, Plant Revamping, Maintenance Support, P&ID Reading
- **Software & Scripting** – Python, C++, Bash, SQL, Git, Linux, Automated Test Suites, Root Cause Analysis
- **Quality & Safety** – Continuous Process Monitoring, Alarm Management, Technical Documentation, Commissioning & Collaudo

Visa & Language

- **Language** – Italian (Conversational / Intermediate), English (Fluent / Professional), Hindi (Native)
- **Work Authorization** – European Long Term Residence Permit (No Visa Sponsorship required). Driving License (Patente B). Available for on-site travel to Rodano/Milan.

Professional Experience

FlowSpace.co — *Automation & Process Systems Lead*
London, UK / Remote — *Mar 2024 – Ongoing*

- **Process Systems Engineering & Supervisory Control:**
  - Architected automated telemetry pipelines and supervisory dashboards monitoring operational parameters across distributed processing nodes.
  - Implemented real-time anomaly detection routines to capture hardware synchronization and process parameter drifts before impact on operations.
  - Authored technical system descriptions, vendor interface guidelines, and maintenance procedures for cross-site engineering teams.
- **Reliability & Vendor Integration:**
  - Coordinated external technology vendors on hardware-software interfaces, ensuring compliant execution against technical project scopes.
  - Supervised continuous infrastructure updates, maintaining 99.9% operational availability across production services.
- *Tools: Python, Linux, Bash, SCADA/Telemetry Dashboards, REST APIs, SQL, Git*

Urlink — *Systems Automation Engineer*
Milan, Italy — *Jul 2023 – Feb 2024*

- Engineered automated verification and telemetry scripts interfacing with industrial field equipment, PLC controllers, and environmental sensor arrays.
- Supported site engineering teams during system commissioning, collaudo, and installation of process automation equipment.

- Formulated technical documentation, equipment wiring schedules, and network topology maps for plant engineers.

UltraStrategy *Automation Developer*
Remote, Germany *Sep 2022 – Jun 2023*

- Developed Python scripts collecting machinery operational data and throughput metrics across manufacturing sites.
- Automated diagnostic checks and generated structured operational performance reports for technical leadership.

Education

Politecnico di Milano *M.Sc. in Management Engineering (Digital Business & ICT)*
Milan, Italy *2020 – 2023*

Thapar Institute of Engineering and Technology
B.E. in Mechanical Engineering
Punjab, India *2014 – 2018*
