Forward Deployed Engineer bridging high-performance AI inference and enterprise production execution. Proven track record in orchestrating multi-step LLM pipelines and embedding directly into client environments to architect and deploy scalable AI solutions. Adept at translating complex technical requirements into deployable reference architectures, optimizing end-to-end performance, and integrating robust systems with enterprise infrastructure and Kubernetes.

Core Competencies

- **Performance Optimization & AI Deployment:** LLM inference optimization, throughput/latency characterization, multi-step agent orchestration, structured output parsing, and RAG architectures.
- **Infrastructure & Cloud:** Kubernetes, Docker, AWS, GCP, Azure, secure API design (REST/GraphQL), and automated CI/CD for robust production-grade system deployments.
- **Client Enablement:** Pre-sales technical leadership, rapid prototyping, end-to-end platform delivery, technical stakeholder collaboration, and executing successful Proofs of Concept (PoVs).
- **Software Engineering:** Python, TypeScript, React/Next.js, SQL, human-in-the-loop governance, and custom enterprise data integrations.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & AI Engineer (Freelance) *Mar 2024 - Aug 2026*

- Built and deployed an enterprise AI pipeline orchestrating multi-step LLM agents and RAG to ingest documents across formats into scalable production systems.
- Embedded directly into customer environments to build integrations against live APIs and booking systems, designing reference architectures, webhooks, and retry logic.
- Designed robust human-in-the-loop governance workflows with schema validation, enabling safe adoption and deployment of AI outputs by technical stakeholders.
- Co-led the migration of a live marketplace to a robust backend architecture, characterizing performance by monitoring latency and reliability, and scaling the active user base from 2,000 to over 4,500.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Delivered rapid automation solutions integrating Google APIs and AI extraction tools, troubleshooting system bottlenecks to streamline field workflows and end-to-end performance.

Clubee.com **Foetz, Luxembourg**

Developer & QA (Freelance) *Sep 2023 - Aug 2024*

- Executed frontend API integrations, automated unit testing, and deployed QA processes to validate system stability across service boundaries and cloud platforms.

Independent Projects

UltraStrategy

AI Automation Developer *2024 - 2025*

- Engineered a custom data extraction engine using LLMs, focusing on strict schema validation, pipeline optimization, and production readiness.

Urlink

Project Manager & Developer *2025*

- Collaborated with clients to architect scalable application logic using Next.js and Supabase, translating complex business needs into successful technical execution.

Education & Certifications

Ca' Foscari University **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor in Entrepreneurship.

Tray.AI Build Practitioner & Microsoft Copilot Studio Agent Academy *Sep 2024*
