Summary

Hands-on Technical Project Manager specialized in delivering AI, automation, and digital innovation initiatives from POC to scalable production. At FlowSpace I led the rollout of AI-driven tools across distributed platforms: I scoped requirements directly with stakeholders, established deployment roadmaps, implemented prompt engineering and evaluation harnesses, and tracked adoption metrics. I managed cross-system integrations (OfficeRnD, Nexudus, Stripe), oversaw workflow automations in n8n, and built an automated AI listing pipeline that generated 900+ reviewed records with strict quality gates. I coordinate multi-disciplinary technical teams, bridging business strategy and rapid AI prototyping. Based in Italy, European Long Term Residence Permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
