As an AI Engineer based in Italy, I specialize in building and deploying agentic workflows. With hands-on experience shipping LLM pipelines and RAG-based agents, I bridge complex architectures with customer-facing deliverables. Fluent in English and conversant in Italian, I am eager to design and scale Agentic AI solutions as a Senior Forward Deployed Engineer for Salesforce's strategic enterprise clients.

Core Competencies

- **Agentic AI and LLMs:** Built production multi-agent systems (n8n, Claude API) for automated listing generation and RAG-based customer support.
- **Full-Stack Engineering:** Led the migration of a live marketplace to Next.js and Laravel, scaling to 4,500+ users.
- **Customer Deployment:** Mediated between internal teams and clients to deliver technical automations.
- **Stack:** TypeScript, Python, Next.js, Node.js, Laravel, OpenAI/Claude APIs, n8n, Supabase, Postgres.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Lead Developer *Mar 2024 - Aug 2026*

- **Agentic Workflows:** Built an AI bot (n8n, Claude, TypeScript) that ingests multi-format brochures to draft workspace listings with a human-in-the-loop escalation.
- **AI Support Agents:** Deployed RAG-based AI agents to answer customer queries against live platform data.
- **Platform Migration:** Led end-to-end migration from a legacy stack to Next.js and Laravel without downtime.

Urlink **Barcelona, Spain (Remote)**

Project Manager and AI-Assisted Developer *Apr 2025 - Jul 2025*

- Delivered platform features and client-driven automations using Next.js and Supabase as a solo implementer.

UltraStrategy **France (Remote)**

AI Automation Developer *Dec 2024 - May 2025*

- Built a CV-parsing LLM data extraction pipeline using n8n and Eden AI.

Get2Germany **Berlin, Germany (Remote)**

Developer and Automation Specialist *Jan 2024 - May 2024*

- Engineered AI-driven workflows to match candidates with courses using n8n and Google APIs.

Clubee **Foetz, Luxembourg (Remote)**

Developer and QA *Sep 2023 - Aug 2024*

- Integrated APIs across the frontend and built shop and dashboard tools while executing unit testing.

Education and Languages

Ca' Foscari University **Venice, Italy**

BA Philosophy, International Studies and Economics *Oct 2020 - Jun 2024*

Languages: English (C2), Italian (Conversational), Hindi (Native)
