Senior Forward Deployed Engineer and Technical Lead with a proven track record of bridging complex customer requirements and production engineering. Fluent in TypeScript, Node.js, and Python, with deep experience architecting REST APIs, enterprise CRM integrations, and agentic LLM pipelines. Adept at leveraging coding agents to accelerate delivery and scale platforms under pressure. Eager to drive enterprise integration, streamline CPaaS deployments, and translate field evidence into robust platform capabilities at Sinch.

Core Competencies

- **Enterprise Integration & Architecture:** REST APIs, webhooks, CRM integrations, data migrations, PostgreSQL, Supabase
- **Production Software & Cloud:** TypeScript, Node.js, Python, Next.js, CI/CD, production debugging, scalable deployments
- **AI-Assisted Delivery:** Multi-agent systems, RAG, Claude/OpenAI APIs, AI-accelerated troubleshooting, prompt engineering
- **Customer & Technical Leadership:** Technical project management, requirements gathering, scoping MVPs, cross-functional communication

Professional Experience

FlowSpace.co **London, UK (Remote)**

Lead Developer *Mar 2024 - Aug 2026*

- Led the end-to-end migration of a live marketplace to a Next.js/Node.js stack, managing the engineering backlog to scale the platform from 2,000 to over 4,500 active users with zero downtime.
- Built repeatable deployment processes for third-party REST APIs and webhooks, automating core CRM workflows and resolving customer-reported issues efficiently.
- Architected an AI-driven pipeline (n8n, Claude, TypeScript) that ingests multi-format inputs to draft listings, leveraging coding agents to accelerate software delivery and testing.
- Served as the primary technical bridge, translating client integration needs into precise data model implications and well-scoped engineering tasks.

UltraStrategy & Urlink **Remote**

Technical Project Manager & AI Automation Developer *Dec 2024 - Jul 2025*

- Embedded as a forward-deployed technical liaison to gather complex requirements from external stakeholders, scoping MVPs and translating them into clear execution specs.
- Engineered and delivered robust data parsing pipelines (Next.js, Supabase, LLMs) to address urgent client bottlenecks in production environments.
- Built durable relationships with customers throughout implementation, stabilization, and troubleshooting, ensuring final technical deliverables aligned with enterprise business goals.

Get2Germany **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Engineered AI-driven workflows to automate business processes via Google APIs, improving database query efficiency and data discovery.

Clubee **Foetz, Luxembourg (Remote)**

Developer & QA *Sep 2023 - Aug 2024*

- Integrated internal and external REST APIs, implemented webhooks across the frontend, and built dashboard tools while executing automated testing for scalability.

Education & Languages

Ca' Foscari University **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Languages: English (C2), Italian (Conversational), Hindi (Native)
