Prabhavit Gupta

Venice, Italy
+39 351 610 7807 • prabhavitg@gmail.com • LinkedIn, GitHub

Forward Deployed Engineer who bridges enterprise customer requirements and production software delivery. Experienced in embedding directly with clients, deploying production AI agent workflows, architecting resilient API integrations, and translating complex customer data into structured systems. Proven track record leading the migration of a live marketplace off a legacy stack to a modern coded architecture scaling to 4,500+ users. Expert in TypeScript, Python, REST APIs, and agentic workflows using Claude Code.

Core Competencies

- **Forward Deployed & Solutions Engineering**: Client-facing deployment, requirements mapping, workflow orchestration, edge-case resolution, human-in-the-loop review systems, and translating customer feedback into core product roadmaps.
- **AI & Agentic Systems**: Claude Code (daily driver), Anthropic API, OpenAI API, multi-step agent orchestration, Model Context Protocol (MCP), tool use, structured JSON parsing, RAG, prompt engineering, confidence scoring.
- **Full-Stack & APIs**: TypeScript, Python, Node.js, Next.js, React, PHP/Laravel, REST APIs, webhooks, rate limiting, retry logic, third-party integrations (CRM, booking, payment platforms).
- **Data & Delivery**: PostgreSQL, Supabase, MySQL, schema design, data pipelines, Git, Playwright, automated testing, production monitoring.

Professional Experience

- **FlowSpace.co** — **London, UK (Remote)**
  Full-Stack & AI Engineer (Freelance) — *Mar 2024 - Aug 2026*
  - Built an end-to-end AI document extraction pipeline orchestrating multi-step LLM agents with tool use, structured output validation, and RAG to ingest client data across heterogeneous formats (PDFs, spreadsheets, web pages) into production.
  - Designed human-in-the-loop approval workflows with strict schema validation and error-handling escalation paths, enabling non-technical stakeholders to safely review and approve AI outputs before deployment.
  - Architected and maintained enterprise API integrations across booking platforms (OfficeRnD, Nexudus), CRM pipelines (Attio, Ample-market), and payment services (Stripe), implementing robust webhook handling, retry logic, and rate limiting.
  - Led the platform migration off a legacy stack onto a coded Next.js and Laravel stack, mapping data schemas and executing zero-downtime cutover while scaling the user base from 2,000 to 4,500+ users.

- **Client Engagements** — **Remote**
  AI Solutions & Forward Deployment Projects — *Jan 2024 - Jul 2025*
  - **Urlink** (Apr 2025 - Jul 2025): Worked directly with client leadership to map operational requirements, build platform logic, and deploy automated workflows using Next.js, Supabase, and Netlify.
  - **UltraStrategy** (Dec 2024 - May 2025): Engineered an LLM-powered data extraction pipeline and document parsing tool with n8n and Eden AI for multi-stakeholder profiles.
  - **Get2Germany.com** (Jan 2024 - May 2024): Integrated Google APIs, built automated discovery tools, and optimized database queries.

Education

- **Ca' Foscari University of Venice** — **Venice, Italy**
  BA Philosophy, International Studies & Economics (Minor: Entrepreneurship) — *Oct 2020 - Jun 2024*

Certifications & Additional Information

- **Certifications**: Microsoft Copilot Studio Agent Academy, Microsoft AI Agents, Microsoft Power Automate, Tray.AI Build Practitioner.
- **Work Authorization & Languages**: EU Long Term Residence Permit (Italy, no sponsorship required in EU); English (fluent/C1), Hindi (native), Italian (beginner). Available immediately.
