Backend Software Engineer specialized in scalable applications, API integrations, and data infrastructure. With a strong foundation in Python and a proven track record of rapidly mastering new ecosystems (including Java and Go via AI-assisted workflows using Claude Code), I design resilient backend systems that handle high-throughput and complex architectural demands. At FlowSpace, I orchestrated asynchronous workflows and optimized event-driven architectures. I am deeply aligned with Traveloka's mission and eager to bring my ownership mindset and backend expertise to the Engineering & IT team in Shanghai, helping deliver world-class scalable services.

Core Competencies

- **Backend Development:** Python, Go (via AI workflows), Java (JVM-based adaptability), Node.js, TypeScript.
- **Scalable Architectures:** Event-driven architectures, REST APIs, asynchronous processing, webhooks, fault tolerance, high availability, PostgreSQL, Docker, AWS.
- **AI & Tooling:** Advanced AI-assisted coding (Claude Code) to dramatically accelerate learning, feature delivery, and cross-functional collaboration.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & Backend Engineer *Mar 2024 - Aug 2026*

- Designed, built, and maintained scalable backend applications and event-driven architectures, ensuring high fault tolerance and seamless data integration across distributed services.
- Migrated legacy infrastructure to a modern stack (Next.js, PostgreSQL), optimizing existing systems for performance and scaling the active user base from 2,000 to over 4,500.
- Integrated complex APIs with asynchronous job processing, webhook retry logic, and strict rate-limiting to serve high-throughput workloads.
- Conducted rigorous code reviews and leveraged AI-assisted workflows (Claude Code) to maintain high software quality, improve performance, and accelerate the development life cycle.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Developed and maintained robust data extraction pipelines, heavily optimizing PostgreSQL queries for concurrent access and large-scale data processing.
- Collaborated with cross-functional team members to ensure database integrity and reliable API integrations.

Clubee.com **Foetz, Luxembourg**

Developer & QA *Sep 2023 - Aug 2024*

- Spearheaded the design and integration of the core Clubee API, focusing on scalable communication and architectural reliability in a highly distributed ecosystem.

Independent Projects

UltraStrategy **Freelance**

Backend Developer *2024 - 2025*

- Built a high-performance data extraction tool, directly managing architectural discussions and translating complex requirements into deployed software solutions.

Urlink **Freelance**

Project Manager & Backend Developer *2025*

- Led end-to-end backend service development, demonstrating a strong sense of ownership in delivering secure, scalable, and automated data pipelines.

Education

Ca' Foscari University of Venice **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor: Entrepreneurship. Demonstrated strong logical thinking, fluency in English, and an adaptable mindset.

Work authorization: EU Long Term Residence Permit (Italy). Open to relocation to Shanghai, China.
