Customer-facing Solutions Engineer with a track record of bridging the gap between complex enterprise requirements and scalable technical solutions. Experienced in partnering with B2B clients, architecting custom API integrations, and executing rapid prototyping to drive time-to-value. Proven ability to design secure pipelines that integrate seamlessly with legacy stacks, CRMs, and enterprise APIs. Passionate about empowering organizations through robust, cloud-based infrastructure and automation.

Core Competencies

- **Technical Sales & Solutions Engineering:** B2B client engagement, technical discovery, rapid prototyping, and translating complex business requirements into deployable technical architectures.
- **Enterprise Integration & APIs:** Designing and deploying custom integrations across CRMs, enterprise APIs, payment flows, and legacy systems with secure rate limiting and webhooks.
- **Production Engineering & Automation:** Python, TypeScript, SQL databases (PostgreSQL, MySQL), Docker, AWS, custom scripting, data pipelines, and automated CI/CD deployments.
- **Project Management & Communication:** End-to-end project ownership, leading technical demonstrations, stakeholder management, and cross-functional collaboration.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & Solutions Engineer (Freelance) *Mar 2024 - Aug 2026*

- Embedded directly with B2B customers to lead technical discovery, mapping complex enterprise workflows into scalable API and platform integrations.
- Architected and deployed custom API integrations linking the core platform with legacy booking systems, managing webhooks, rate limits, and secure retry logic across service boundaries.
- Built and shipped robust data pipelines and automated workflows, reducing manual operational overhead for clients and accelerating deployment cycles.
- Co-led the migration of a live marketplace to a modern Next.js and backend architecture, seamlessly scaling the active enterprise user base from 2,000 to over 4,500 with zero downtime.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Delivered rapid, custom automation solutions by integrating external APIs to streamline client workflows, driving immediate operational efficiency.

Clubee.com **Foetz, Luxembourg**

Developer & QA (Freelance) *Sep 2023 - Aug 2024*

- Executed frontend API integrations and established automated QA processes, ensuring high-reliability software delivery for end-users.

Tractionboard.co **Utrecht, Netherlands**

Developer Intern *Aug 2023 - Oct 2023*

- Engineered early-stage integrations bridging internal platform capabilities with third-party APIs (OpenAI, Sendgrid), accelerating prototyping and user adoption.

Independent Projects

UltraStrategy

Automation Solutions Developer *2024 - 2025*

- Engineered a custom data extraction engine utilizing LLMs and modern APIs to streamline operations, enabling the client to scale their matching capabilities effectively.

Urlink

Project Manager & Solutions Architect *2025*

- Partnered directly with the client to translate abstract business requirements into a concrete, scalable technical platform, architecting the application logic using Next.js and Supabase.

Education & Certifications

Ca' Foscari University **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor in Entrepreneurship.

Tray.AI Build Practitioner & Microsoft Copilot Studio Agent Academy *Sep 2024*
