Senior Backend Engineer with extensive experience in designing and developing scalable server-side architectures using C# and .NET. Proven track record of optimizing complex systems, integrating third-party APIs, and mentoring engineering teams. Excited to bring my expertise in high-performance ticketing and event management solutions to Vivaticket, driving technical excellence and seamless user experiences.

Core Competencies

- **C# & .NET Framework:** Expert-level proficiency in building robust, scalable RESTful APIs and microservices.
- **Database Architecture:** Strong experience designing and optimizing both relational (SQL Server) and NoSQL databases for high-throughput applications.
- **Cloud & Containerization:** Proficient in deploying distributed systems using Docker, Kubernetes, and CI/CD pipelines in Agile environments.
- **Technical Leadership:** Experienced in mentoring junior developers, conducting code reviews, and collaborating with cross-functional product and QA teams.

Professional Experience

Tech Solutions S.p.A. **Milan, Italy**

Senior Backend Engineer *2021-2026*

- Architected and developed mission-critical microservices using C# and .NET Core, processing over 50,000 requests per minute with sub-second latency.
- Led the migration of legacy monolith applications to Docker and Kubernetes, reducing infrastructure costs by 30% and improving deployment frequency.
- Designed and optimized SQL Server schemas and complex queries, significantly reducing data retrieval times for the core platform.
- Mentored a team of 4 junior developers, establishing best practices for testing, CI/CD, and Agile delivery.

Innovatech IT **Venice, Italy**

Backend .NET Developer *2017-2021*

- Developed and maintained scalable REST APIs using ASP.NET Web API and Entity Framework.
- Integrated various third-party payment and ticketing APIs, ensuring secure and transactional consistency across distributed systems.
- Collaborated with frontend engineers and product managers to deliver seamless end-to-end user experiences.
- Implemented automated unit and integration testing pipelines, increasing code coverage to 85%.

DataCorp **Bologna, Italy**

Software Engineer *2014-2017*

- Built data processing pipelines in C# to handle large volumes of transactional data.
- Optimized database performance through indexing and query tuning in SQL Server.

Education

University of Bologna **Bologna, Italy**

Master of Science in Computer Science *2011-2014*

Specialization in Distributed Systems and Software Architecture.

University of Bologna **Bologna, Italy**

Bachelor of Science in Computer Science *2008-2011*

Graduated with Honors.

Languages

- **English:** Fluent
- **Italian:** Native/Bilingual
