Prabhavit Gupta

+39-351-610-7807 prabhavitg@gmail.com Linkedin Venice, Italy

Career Summary

- Automation Project Engineer with dual degrees in Mechanical Engineering and Management Engineering (Politecnico di Milano), experienced in industrial automation project lifecycle and systems integration.
- Solid foundation in pharmaceutical automation engineering, computerized systems qualification (URS, FDS, FAT/SAT, CSV/GAMP), and standard operating procedure (SOP) drafting.
- Hands-on background with PLC/SCADA systems, continuous historian databases, OT network segregation, and industrial change control protocols.
- Experienced in project budgeting, vendor contract coordination, cross-functional stakeholder alignment (QA, Production, Maintenance), and technology innovation scouting.

Technical Skills

- **Automation & Control Systems** – PLC Programming Logic (Siemens, Rockwell), SCADA Systems, BMS, DCS Fundamentals, Traceability Vision Systems
- **Pharma Project & Quality** – User Requirements Specifications (URS), GAMP 5, GMP Compliance, Computerized Systems Validation (CSV), Change Control, SOPs
- **OT Infrastructure & Cybersecurity** – OT Network Segregation, Industrial Ethernet, Profinet, Modbus, NIS2 Cybersecurity Awareness, Historian Databases
- **Project Management & Engineering** – Feasibility Studies, Budget & Cost Tracking, Vendor Procurement & Subcontractor Management, Site Commissioning (Collaudo)
- **Software & Tools** – Python, SQL, Relational Databases, Linux, Git, Jira, Technical Documentation

Visa & Language

- **Language** – Italian (Conversational / Intermediate), English (Fluent / Professional), Hindi (Native)
- **Work Authorization** – European Long Term Residence Permit (No Visa Sponsorship required). Driving License (Patente B). Available for on-site travel to Parma.

Professional Experience

FlowSpace.co — *Automation Project & Systems Lead*
London, UK / Remote — *Mar 2024 – Ongoing*

- **Project Management & Technical Delivery:**
  - Managed end-to-end delivery of automated process systems and data pipelines, aligning technical specifications with stakeholder operational goals.
  - Formulated detailed requirement specifications (URS), technical work scopes, and acceptance testing protocols for external suppliers.
  - Tracked project milestones, resource allocation, and budget variance, delivering complex milestones on schedule.
- **Systems Validation & Continuous Quality:**
  - Authored validation documentation, technical SOPs, and system change control procedures maintaining stringent compliance standards.
  - Supervised continuous platform upgrades and telemetry integrations, sustaining 99.9% operational availability across production services.
- *Tools: Python, Linux, Relational Databases, SQL, REST APIs, Git, Project Management*

Urlink — *Systems Automation Engineer*
Milan, Italy — *Jul 2023 – Feb 2024*

- Supported site engineering teams in commissioning, qualification, and acceptance testing (collaudo) of automated production equipment.
- Liaised with cross-functional quality and operations departments to verify automated data acquisition and sensor telemetry against specifications.

- Drafted commissioning checklists, hardware interface protocols, and maintenance SOPs for manufacturing technicians.

UltraStrategy *Automation Developer*
Remote, Germany *Sep 2022 – Jun 2023*

- Developed Python automation routines tracking equipment cycle parameters and efficiency metrics across industrial operations.
- Generated structured reporting pipelines summarizing machine uptime, process trends, and quality compliance metrics.

Education

Politecnico di Milano *M.Sc. in Management Engineering (Digital Business & ICT)*
Milan, Italy *2020 – 2023*

Thapar Institute of Engineering and Technology
B.E. in Mechanical Engineering
Punjab, India *2014 – 2018*
