Prabhavit Gupta

+39-351-610-7807 prabhavitg@gmail.com Linkedin Venice, Italy

Career Summary

- Robotics & Automation Software Engineer with a mechanical engineering foundation and hands-on experience in software validation, testing automation, and industrial systems.
- Proficient in Python, C++, and Bash scripting for test harness development, motion validation, and hardware-software integration across automated manufacturing systems.
- Proven background combining Politecnico di Milano engineering training with production automation, troubleshooting, and rigorous quality assurance protocols.

Technical Skills

- **Robotics & Automation** – Robotics Software Validation, Toolpath Testing, Additive Manufacturing Systems, Industrial Automation, Motion Validation
- **Programming & Scripting** – Python, C++, JavaScript, Bash, SQL, Git, Linux
- **Testing & QA** – Software Test Automation, Hardware-in-the-Loop Validation, Regression Testing, Bug Tracking, Postman
- **Protocols & Architecture** – REST APIs, Modbus/Serial, Microservices, Docker, Technical Documentation

Visa & Language

- **Language** – Italian (Conversational / Intermediate), English (Fluent / Professional), Hindi (Native)
- **Work Authorization** – European Long Term Residence Permit - No Sponsorship required. Driving License (Patente B).

Professional Experience

FlowSpace.co — *Automation Lead Developer (Full time, Freelance)*
London, UK — *Mar 2024 – Ongoing*

- **Technical & Systems Responsibilities:**
  - Developed automated test suites and validation harnesses in Python and Playwright, reducing software regression bugs by 40%.
  - Engineered real-time telemetry and error logging pipelines to capture edge-case system faults and improve runtime reliability.
  - Created comprehensive technical test plans, interface contract documentation, and validation protocols for engineering teams.
- **Quality Assurance & Operations:**
  - Supervised platform migration and continuous integration workflows ensuring 99.9% uptime across production services.
  - Performed root cause analysis on software exceptions and collaborated with R&D to deploy permanent system patches.
- *Tools: Python, Linux, Bash, Playwright, REST APIs, Docker, Git, Jira*

Urlink — *Systems Automation Engineer*
Milan, Italy — *Jul 2023 – Feb 2024*

- Developed Python validation scripts to verify data integrity across connected operational hardware and cloud databases.
- Collaborated with field engineering teams to resolve tier-2 software issues, delivering diagnostic tooling and custom patches.
- Documented system behaviors, automated regression checks, and conducted validation tests before production rollouts.

UltraStrategy — *Automation Developer*
Remote, Germany — *Sep 2022 – Jun 2023*

- Automated manufacturing and operational data extraction pipelines using modular Python scripts and REST endpoints.
- Implemented automated validation scripts enforcing strict schema adherence and anomaly detection.

Education

Politecnico di Milano — *M.Sc. in Management Engineering (Digital Business & ICT)*
Milan, Italy — *2020 – 2023*

Thapar Institute of Engineering and Technology — *B.E. in Mechanical Engineering*
Punjab, India — *2014 – 2018*
