Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Architected and deployed an AI document ingestion pipeline (n8n, Claude API, TypeScript) extracting unstructured data from PDF, spreadsheet, image, and web brochures into validated backend schemas with human-in-the-loop review; 900+ listings drafted.
- Shipped autonomous customer support agents querying live platform databases, incorporating confidence scoring thresholds and deterministic fallback paths that escalate ambiguous inquiries to human specialists.
- Engineered bidirectional REST API and webhook integrations with property management and booking systems (OfficeRnD, Nexudus), establishing robust data synchronization, schema validation, and fault-tolerant error handling.
- Led platform migration off a legacy stack to modern Next.js and Laravel (PostgreSQL), scaling from 2,000 to 4,500+ active users without downtime, alongside automated CRM lead routing and enrichment pipelines.
