AI Solutions & Automation Engineer with 3 years of experience building and shipping LLM-driven applications and complex API integrations. Adept at owning end-to-end solution designs, from 0 to 1 agent building to production-grade deployment. Strong background in translating customer business needs into technical architecture, building robust data ingestion pipelines, and deploying automated workflows in production environments.

Core Competencies

- **Integration Engineering**: Extensive experience in integrating enterprise systems via REST APIs, managing authentication, webhooks, and complex data flows.
- **Conversational & Agent Design**: Built human-in-the-loop AI automations and conversational agents parsing unstructured data formats into structured outputs.
- **Software Development**: Hands-on production coding in TypeScript, Python, Next.js, and Laravel.
- **Cloud & Architecture**: Solid working experience with SQL databases, Docker, API architectures, and debugging critical infrastructure.
- **Customer-Facing Delivery**: Strong track record of owning projects end to end, collaborating with clients to scope technical constraints, and iterating based on KPIs.
