Summary

Software engineer who connects AI research capabilities, developer enablement, and customer-facing products. Experienced in building internal platforms and tooling that reduce researcher cognitive load, while shipping production web applications and resilient APIs. At FlowSpace, owned platform architecture, migrated a live marketplace off a legacy stack to Next.js and Laravel (scaling to 4,500+ users), built an automated ingestion pipeline with human-in-the-loop review (900+ listings drafted), and deployed live support agents. Daily stack: Python, TypeScript, Next.js, Docker, CI/CD, Claude Code, and agentic workflows.

Skills

- **Enablement & Developer Platforms:** Internal developer tooling, reproducible environments, CI/CD automation, Claude Code agentic workflows, repository standards, testing automation, n8n, human-in-the-loop review
- **Product Engineering & Full Stack:** Python, TypeScript, JavaScript, Next.js, Node.js, Laravel (PHP), PostgreSQL, Supabase, responsive UI, state management, REST APIs, webhooks, schema validation
- **Infrastructure & Reliability:** Docker, containerized deployments, cloud infrastructure (AWS, GCP), Playwright, automated QA, API contracts, complexity management, technical debt containment

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Migrated a live marketplace off a legacy stack to coded Next.js and Laravel, establishing clean API abstractions, repository standards, and scaling from 2,000 to 4,500+ active users.
- Built an AI ingestion pipeline (n8n, Claude API, TypeScript) parsing unstructured brochures (PDF, spreadsheets, web) into structured listings with human-in-the-loop review; 900+ listings drafted.
- Deployed support agents that answer user queries against live platform records, with confidence-based escalation to human operators.
- Integrated OfficeRnD and Nexudus APIs for automated bookings, and built CRM and GTM automations for lead routing and outbound sync.

Get2Germany.com **Jan 2024 - May 2024**
Developer & Automation Specialist (Part-time) *Berlin, Germany*

Integrated Google APIs, built AI automation tools in n8n for data extraction and cataloging, and optimized relational database queries.

Clubee.com **Sep 2023 - Aug 2024**
Developer & QA (Full-time, Freelance) *Foetz, Luxembourg*

Integrated the Clubee API across the frontend, developed federation-dashboard tools, and established unit testing and QA suites.

Tractionboard.co **Aug 2023 - Oct 2023**
Developer (Internship) *Utrecht, Netherlands*

Integrated OpenAI and Sendgrid APIs, built responsive frontend interfaces, and implemented automated error tracking.

Freelance Projects

- **Urlink** (2025), Project Manager & AI-Assisted Developer. Built platform architecture and client logic with Next.js, Supabase, and Netlify; automated continuous integration and delivery.
- **UltraStrategy** (2024 to 2025), AI Automation Developer. Built an automated CV-parsing tool (LLM data extraction) with n8n and Eden AI, delivering structured JSON schemas.
- **Qomodo** (2024 to 2025), AI Developer. Built branch management dashboards from Figma designs, implementing modular UI components and state handling.
