## Experience

**FlowSpace.co** **Mar 2024 – Present**
*Lead Developer (Full-time, Freelance)* *London, UK (remote)*
*Own product and automation end to end for a workspace marketplace.*

- Built GTM automations for the sales funnel: lead enrichment, routing, and outbound.
- Automated CRM lead capture by building an integration between the company CRM and the platform.
- Cut manual support work with AI agents that handle customer queries.
- Designed and shipped an AI listing bot with a human in the loop. It ingests a brochure in any format (PDF, website, image, or spreadsheet), drafts the listing, and pushes it to the backend after review. Owned it end to end.
- Own the API integrations with OfficeRnD and Nexudus for automated bookings.
- Led the platform migration from a legacy no-code stack to a coded Next.js and Laravel stack. Mapped the data model, chose the migration path per entity (API endpoints or CSV export), and drove the cutover.
- Scaled the platform from 2,000 to 4,500+ users through iterative product development.
- Documented product and business logic with the dev team. Coordinated delivery between the internal team and an external agency.
- Triage and resolve customer issues end to end.
- Tools: n8n, Claude, Claude Code, TypeScript, Laravel, Postman, Playwright.
