Summary

I build and maintain complex software systems that integrate with AI providers and process structured data at scale. At FlowSpace I built the AI layer on a live marketplace: a document processing pipeline using LLM structured outputs and tool use that takes any source format, extracts structured data, evaluates output quality, and pushes verified results to the backend. I also built support agents with retrieval-augmented generation against live data, and drove the platform migration from a legacy stack to Next.js and Laravel, scaling it from 2,000 to 4,500+ users. I write Python, TypeScript, Node.js, React and PostgreSQL, and I use Claude Code as my primary development environment.

Skills

- **Languages & frameworks:** Python, TypeScript, JavaScript, Node.js, Express, React, Next.js, PostgreSQL, Redis, Supabase, Laravel (PHP)
- **AI & LLM integration:** LLM APIs (Claude, OpenAI) with structured outputs, tool use and function calling, prompt engineering, evaluation and testing of AI outputs, retrieval-augmented generation, document processing pipelines
- **Software engineering:** building and maintaining complex systems, data modelling, REST API design, async processing, CI/CD, diving into existing codebases, end-to-end feature ownership
- **Infrastructure & automation:** webhook-driven pipelines, n8n workflow orchestration, third-party platform integrations (Attio, OfficeRnD, Nexudus, Amplemarket)

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
