Summary

Full stack engineer with production experience across TypeScript, React, Node.js, Next.js, Laravel and PostgreSQL. At FlowSpace I took over a live coworking marketplace, migrated it off a legacy stack onto a coded product, built its API and frontend, and scaled it from 2,000 to 4,500+ users. I also built AI-powered features on top: an automated listing pipeline and support agents. I write reliable, well-tested code, own problems end to end, and work directly with stakeholders and customers.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**

Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built and maintained the REST API (Laravel), the React/Next.js frontend, and the PostgreSQL data layer. Shipped booking integrations with OfficeRnD and Nexudus.
- Built an AI listing pipeline with a human in the loop: it takes unstructured documents, extracts structured data via LLMs, and pushes verified listings to the backend.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
