EY Hiring Team
FS Technology Consulting - Data & Analytics
Dublin, Ireland

Dear EY FS Technology Consulting Team,

I am writing to express my strong interest in the Forward Deployed AI Engineer - Manager position based in Dublin. As an AI Solutions Engineer who has built multi-agent pipelines and deployed robust LLM infrastructure for enterprise clients, I am drawn to EY's NextWave strategy and the challenge of driving AI-led transformation for complex, regulated financial services organizations. My background combines deep, hands-on GenAI engineering with the client-facing architectural leadership necessary to take enterprise AI from technical discovery to confident, scalable production.

Over the past two and a half years at FlowSpace, I have embedded myself with both internal teams and external customer stakeholders to architect and deliver applied AI solutions. My experience directly mirrors the core responsibilities of a forward-deployed manager at EY:

- **Multi-Agent Orchestration & RAG:** I engineered a multi-format AI listing pipeline leveraging Claude and OpenAI APIs, implementing multi-step tool orchestration and structured JSON extraction. This allowed us to ingest unstructured customer data (PDFs, spreadsheets, images) with a human-in-the-loop review mechanism, successfully automating over 900 listings.
- **Production Reliability & Integration:** I deployed live customer-facing support AI agents equipped with confidence-scoring guardrails to ensure safe escalation to human operators. Concurrently, I built bidirectional integrations with third-party enterprise platforms, handling rate limits, webhook retry logic, and strict schema validation.
- **Technical Leadership & Delivery:** I led the end-to-end data cutover and platform migration from a legacy stack to a modern Next.js/PostgreSQL architecture, successfully scaling our active user base from 2,000 to over 4,500 with zero downtime.

Financial services clients require AI solutions that are not only innovative but fundamentally reliable, auditable, and secure. I excel at translating ambiguous business bottlenecks into strict technical specifications and reusable architectural patterns. I am highly motivated by the opportunity to bring this rigor to EY's clients in banking and wealth management.

As an Italian EU Long Term Residence Permit holder, I have unrestricted work rights across the EU and in Ireland, and I am fully prepared to relocate to Dublin.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my technical background and consulting mindset align with the ambitious goals of the EY Dublin team.

Kind regards,

Prabhavit Gupta
