Hiring Team – Area CTO (LoB CSS)
Leonardo S.p.A.
Via Tiburtina 1020
00156 Rome, Italy

Motivation letter for Application for Innovation & Capability Specialist – Rome (Via Tiburtina 1020 / Area CTO)

Dear Hiring Manager,

I am writing to express my strong interest in the Innovation & Capability Specialist position within the Area CTO at Leonardo, supporting the Line of Business CSS of the Electronics Division in Rome. Having closely followed Leonardo's international standing in aerospace, defense, and security, I am drawn to the CTO's focus on advancing high-technology capabilities across training solutions, logistics information systems, and experimental test ranges. Translating emerging technologies such as Artificial Intelligence, data analytics, and modular architectures into operational, mission-critical capabilities aligns directly with my background in software engineering, systems integration, and technical experimentation.

Over the past three years, I have successfully transformed abstract business requirements into production-ready features across multiple European technology projects spanning different countries and sectors; from a sports management platform in Luxembourg to strategic consultant platforms in France and Spain.

Operating extensively as an AI Solutions Developer, I engineered AI-based data parsing tools using n8n for UltraStrategy, automated complex workflows for Get2Germany, and executed rigorous quality assurance and API integrations for Clubee.

During my tenure at FlowSpace (based in London), I took over an already built system and managed it until its eventual migration to Laravel and Next.js. Debugging the system, I also partook in GTM automations using their CRM. I engineered production AI extraction pipelines and automated data workflows with 278 automated tests and human-in-the-loop validation, onboarding over 20 operators and directly contributing to scaling the platform from 2,000 to over 4,500 active users.

My daily engineering workflow connects directly with the capability lifecycle sought by Leonardo's LoB CSS: I analyze and evaluate emerging technologies (including LLMs, AI agents, and RAG architectures), prototype modular service-oriented workflows, and draft technical specifications that prioritize interoperability and system reliability. Furthermore, my academic background in Economics and Entrepreneurship from Ca' Foscari University provides me with the analytical and financial grounding required for investment governance: from formulating structured business cases and evaluating technology ROI to monitoring milestone budgets and preparing clear executive reporting.

I extensively leverage AI coding assistants like Claude Code alongside modern frameworks (TypeScript, Next.js, Laravel, Supabase) to rapidly test hypotheses and deploy MVP architectures. Recently, I oversaw a complex architectural migration from a low-code infrastructure to

a robust Next.js and Laravel stack, ensuring that our rapid prototypes evolved successfully into highly scalable, reliable, and secure enterprise products.

I am also consistently open to learning new systems and domain methodologies. I recently completed certifications in Microsoft Copilot Studio Agent Academy, Microsoft AI Agents, and Tray.AI Build Practitioner, and I am motivated to apply model-based systems engineering (MBSE) approaches to Leonardo's high-reliability operational domains.

As a graduate of Ca' Foscari University, I have been living in Venice for 5 years, hold a European Long-Term Residence Permit requiring no visa sponsorship, and have the professional English proficiency required for international collaboration. I am also fully available for on-site presence at the Rome Via Tiburtina facility, hybrid arrangements, and short-to-medium term business travel as project demands.

I would welcome the opportunity to discuss how my practical background in evaluating emerging technologies, engineering modular capabilities, and executing business cases can immediately contribute to your team of experts.

Thank you for your time and consideration.

Sincerely,

Prabhavit Gupta

I hereby authorize the processing of my personal data contained in this document in compliance with the European General Data Protection Regulation (EU Regulation 2016/679) and Italian Legislative Decree 196/2003, as modified by Legislative Decree 101/2018, for the purposes of recruitment and selection.
