Subject: Application for Senior Forward Deployed AI Engineer

Dear Hiring Team,

I am writing to apply for the Senior Forward Deployed AI Engineer role at Nordea. With a strong background in taking ambitious AI visions and transforming them into production-grade, integrated solutions, I am excited by Nordea's initiative to modernise its data technology and accelerate AI adoption across the organisation.

As a Senior Full-Stack and AI Engineer, I specialise in building scalable agentic AI solutions and overseeing the full application lifecycle. At FlowSpace, I partnered directly with business stakeholders to identify high-impact use cases and delivered our core AI layer. I designed and deployed multi-agent support systems using Retrieval-Augmented Generation (RAG) against live enterprise data, and implemented robust document processing pipelines utilising LLM structured outputs. By orchestrating these AI capabilities through secure REST APIs, webhooks, and n8n, I successfully scaled the platform's automation capabilities for over 4,500 active users.

I understand that the Forward Deployed AI team requires engineers who are not only technically proficient with frameworks like Python, LangGraph, and cloud CI/CD pipelines, but who also excel as trusted technical partners to product owners and business units. My experience operating autonomously from system architecture through to production rolloutcoupled with a strong commitment to ethical and secure AI governancealigns closely with the demands of building reliable, enterprise-grade AI in a highly regulated environment.

I hold a European Long-Term Residence Permit issued in Italy, which grants me unrestricted working rights across the EU without the need for sponsorship, making me fully available to support the team remotely or in hybrid setups aligned with your Nordic hubs.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience in delivering end-to-end agentic AI solutions can drive measurable impact at Nordea.

Sincerely,

Prabhavit Gupta
