Dear SAP Hiring Team,

As an AI Solutions Engineer who has spent the last two years architecting and deploying LLM-driven applications and multi-agent workflows for enterprise clients, I am excited to apply for the Forward Deployed AI Engineer (Expert/Senior) position at SAP. I specialize in bridging the gap between cutting-edge AI capabilities and real-world business value, working directly with stakeholders to integrate generative AI into complex operational environments.
In my recent role leading AI development at FlowSpace, I spearheaded the transition from legacy systems to AI-native architectures, demonstrating the technical rigor and customer-facing agility required of a Forward Deployed Engineer. Here is how my experience aligns with your mission:

- **Agentic AI & LLMs:** Architected a production-grade Listing Bot using Claude, TypeScript, and RAG pipelines that ingests unstructured data to generate structured outputs, heavily utilizing multi-agent orchestration and human-in-the-loop validation.
- **Enterprise Integration:** Engineered robust integrations mapping AI workflows to external CRM and booking systems, ensuring seamless data flow and tangible business process automation.
- **Customer-Embedded Delivery:** Acted as the primary technical authority for clients, successfully translating ambiguous enterprise requirements into scalable, cloud-native deployments ahead of schedule.

SAP's commitment to building AI-native enterprise applications through SAP AI Core and BTP presents exactly the kind of large-scale, transformative challenge I am eager to tackle. I am deeply aligned with the "shoulder-to-shoulder" deployment model, knowing firsthand that the hardest part of enterprise AI is not just the model, but integrating it reliably into messy, real-world data ecosystems.
I am drawn to this senior-tier opportunity in Garching and bring a strong foundation in modern cloud-native engineering. I would welcome the chance to discuss how my hands-on experience deploying AI agents can accelerate value realization for SAP's customers.
I look forward to hearing from you.

Kind regards,

Prabhavit Gupta
