Work Authorization: Italian EU Long-Term Residence Permit (No EU/Italy Sponsorship Required)

Target Role: Full Stack Developer – CT Office Incubation Team (Milan, Hybrid 50% / Open to Travel)

Professional Summary

Full Stack Developer with 3 years of hands-on experience in rapid prototyping, emerging technology experimentation, and building end-to-end web applications across European tech startups. Proven track record turning ambiguous product requirements into testable production prototypes, building resilient REST APIs, data pipelines, and responsive frontends (Next.js, React, TypeScript, Python, Laravel). AI-native engineer skilled in leveraging AI-assisted coding tools (Claude Code, Cursor, GitHub Copilot) responsibly with rigorous validation, automated testing (278+ test suites), and baseline security hygiene. Experienced with containerized deployments (Docker), Linux system administration, and edge networking. Based in Italy with permanent EU work authorization, bilingual in English (C2), and ready for the hybrid Milan incubation role.

Core Technical Competencies

- **Full Stack & Languages:** TypeScript, JavaScript, Python, PHP, SQL, HTML5, CSS3/Tailwind CSS.
- **Frontend & UI Engineering:** Next.js (App Router), React, Responsive Design, Component Architecture, Figma-to-Code.
- **Backend & API Architecture:** RESTful API Design & Integration, Webhooks, Event-Driven Patterns, Node.js, Laravel 11, Python (FastAPI/Scripts).
- **Databases & Storage:** PostgreSQL (Supabase, Neon), MySQL, Redis, Schema Design, Data Migrations, Supabase Storage.
- **Cloud, Containers & Edge:** Docker, GCP, Oracle Cloud VPS, Linux (Ubuntu, systemd), Caddy (Auto-TLS Reverse Proxy), Cloudflare Tunnels, WAF, Edge Network Reliability.
- **AI-Assisted Development:** Claude Code, Cursor, GitHub Copilot, Prompt Engineering, RAG Architectures, Code Quality/IP Validation, Human-in-the-Loop Review Flows.
- **Testing, Quality & DevOps:** Git/GitHub Workflows (PRs, Code Reviews, CI/CD), Pytest, Playwright, Postman, Jira, Agile/Scrum.

Professional Experience

FlowSpace.co — London, UK (Remote)
Lead Developer / Full Stack Engineer (Freelance) — *Mar 2024 – Present*

- Designed, prototyped, and deployed an end-to-end AI listing and data pipeline (Next.js on Vercel, Python crawler, Neon PostgreSQL, Supabase storage), onboarding 20+ commercial operators (WeWork UK&I, Sub800) and indexing 1,000+ office units.
- Built bounded web crawler and data transformation engine with magic-byte file classification and boilerplate-hijack guards, authoring 278 automated tests to guarantee zero regressions.
- Scaled the platform user base from 2,000 to over 4,500 active users through rapid iterative prototyping, bug remediation, and user experience enhancements.
- Led the migration of legacy Bubble.io infrastructure into a modern Next.js and Laravel (MySQL) service stack, structuring relational database schemas and documenting REST APIs.
- Integrated third-party partner REST APIs (Office RnD, Nexudus) for automated booking synchronization, CRM lead pipelines, and SendGrid communications with robust retry logic.
- Established security best practices including SSH-tunneled bastion access for production databases, secret segregation, and peer pull-request review routines.

Urlink — Barcelona, Spain (Remote)
Project Manager & AI-Assisted Developer (Freelance) — *Apr 2025 – Jul 2025*

- Rapidly built and launched an MVP web platform from ground up leveraging modern AI-assisted engineering tools (bolt.new, Claude Code, Cursor) under accelerated delivery timelines.
- Implemented responsive frontend UI components, authentication, and database schemas on Supabase (PostgreSQL) and Netlify.
- Validated all AI-generated code for architectural consistency, IP compliance, and security standards prior to production deployment.

UltraStrategy.com — France (Remote)
Automation Developer (Collaborator) — *Dec 2024 – May 2025*

- Engineered automated multi-format document extraction pipelines utilizing n8n workflows and Eden AI/LLM endpoints.
- Designed modular REST API integration layers to handle asynchronous data parsing with structured validation and error handling.

Qomodo — Milan, Italy (Remote / Collaborator)

AI & Full Stack / Low-Code Developer *2024 – Jan 2025*

- Collaborated with Milan-based engineering team to build multi-branch enterprise management dashboards translated directly from Figma specifications.
- Implemented relational database structures and access control logic for multi-tenant internal tooling.

Get2Germany.com Berlin, Germany (Remote)
Lead Developer & Automation Specialist (Part-time) *Jan 2024 – May 2024*

- Integrated Google APIs for analytics and tracking; optimized database queries and built responsive user interface modules.
- Prototyped AI-based recommendation tools to match international candidates with relevant educational and professional programs.

Clubee.com Foetz, Luxembourg (Remote)
Full Stack Developer & Quality Assurance (Freelance) *Sep 2023 – Aug 2024*

- Integrated Clubee REST APIs across the entire frontend architecture, ensuring robust payload validation and state management.
- Executed unit testing and quality assurance across sports federation dashboards, custom domain routing, and e-commerce shops.

Tractionboard.co Utrecht, Netherlands (Remote)
Software Developer Intern *Aug 2023 – Oct 2023*

- Developed full-stack prototype features, integrated OpenAI and SendGrid APIs, and performed cross-browser debugging.

Cloud, Edge & Systems Prototyping Projects

- **Edge & Autonomous Cloud Server Lab:** Provisioned and maintained personal Linux VPS environments (Oracle Cloud, GCP) hosting containerized microservices (Docker), Caddy reverse proxy with automated TLS, Cloudflare Tunnels, and WireGuard VPN; practiced firewall isolation (firewalld) and edge routing for high reliability under constrained conditions.
- **Automated Ingestion Spider & Test Harness:** Authored Python-based crawler featuring rate-limiting, edge-case recovery, and 278 unit/integration tests to continuously feed structured data into cloud databases.

Education

Ca' Foscari University of Venice Venice, Italy
Bachelor's in Philosophy, International Studies & Economics (Minor in Entrepreneurship) *Oct 2020 – Jun 2024*

- Strong foundation in formal logic, analytical problem solving, systems economics, and self-directed software development.

Certifications

- Microsoft Copilot Studio Agent Academy · Microsoft: Introduction to Building AI Agents
- Microsoft Power Automate Certification · Tray.ai Build Practitioner & Build Foundations (Sep 2024)

Languages & Work Authorization

- **Work Authorization:** Italian EU Long-Term Residence Permit – Full legal right to work across Italy and the EU without visa sponsorship.
- **Languages:** English (Fluent / Bilingual C2), Hindi (Native), Italian (Conversational / Living in Italy 5+ years).
- **Availability & Logistics:** Venice, Italy; available on 2 weeks' notice; ready for 50% hybrid in Milan and project travel.
