Motivation letter for Application for AI Implementation Specialist – Amadora, Lisbon, Portugal

Dear Hiring Manager,

I am writing to express my interest in the AI Implementation Specialist position at Siemens Energy in Amadora. As an AI Solutions and Automation Engineer with extensive experience developing agentic workflows and automated pipelines, I have followed Siemens Energy's leadership in driving the global energy transition through technological innovation. The mission of this role – identifying operational AI opportunities, building scalable copilots and agents, and fostering active adoption across business teams – directly aligns with my background in LLM orchestration, enterprise tool integrations, and hands-on stakeholder enablement.

Over the past three years, I have successfully transformed abstract business requirements into production-ready features across multiple European technology projects spanning different countries and sectors; from a sports management platform in Luxembourg to strategic consultant platforms in France and Spain.

Operating extensively as a freelance AI Solutions Developer, I engineered AI-based data parsing tools using n8n for UltraStrategy, automated complex workflows for Get2Germany, and executed rigorous quality assurance and API integrations for Clubee.

During my tenure at FlowSpace (based in London), I took over an already built system and managed it until its eventual migration to Next.js and Laravel. Alongside debugging the system, I also partook in GTM automations using their CRM. I engineered AI agents and automated data parsing tools that directly contributed to scaling the platform from 2,000 to over 4,500 active users.

My daily engineering workflow centers on the core technologies and operational objectives outlined in your posting: I build and deploy AI agents, automate enterprise workflows, and connect foundational models like OpenAI and Anthropic with business systems using prompt chaining, RAG architectures, and tools like n8n and Microsoft Power Automate. Having completed certifications in Microsoft Copilot Studio and Power Automate, I design practical copilots and agents with human-in-the-loop review guardrails, ensuring solutions comply with strict data governance, InfoSec requirements, and release processes. Furthermore, having operated as both a technical builder and a client-facing consultant across diverse European teams, I regularly conduct hands-on coaching and workshops to demystify AI capabilities, uncover high-impact use cases, and drive active adoption across non-technical business units.

I extensively leverage AI coding assistants like Claude Code alongside low-code platforms and modern frameworks (TypeScript, Next.js, Laravel, Supabase) to rapidly test hypotheses and deploy MVP architectures. I am also continuously expanding my technical capabilities, holding certifications from the Microsoft Copilot Studio Agent Academy and in Power Automate workflow orchestration.

As a graduate of Ca' Foscari University, I have been living in Venice for 5 years, hold a European Long-Term Residence Permit requiring no visa sponsorship anywhere in the European Union, and have the professional English proficiency required for international collaboration. I am also fully available for relocation to the Lisbon area or hybrid arrangements, as well as business travel as project demands.

I would welcome the opportunity to discuss how my practical background in building AI agents, deploying Microsoft Copilots, and driving workflow automation can create measurable productivity gains for Siemens Energy.

Thank you for your time and consideration.

Sincerely,

Prabhavit Gupta

I hereby authorize the processing of my personal data contained in this document in compliance with the European General Data Protection Regulation (EU Regulation 2016/679) and Italian Legislative Decree 196/2003, as modified by Legislative Decree 101/2018, for the purposes of recruitment and selection.

Work Authorization: European Long-Term Residence Permit (EU citizen equivalent work rights; no sponsorship required)

PROFESSIONAL SUMMARY

AI Implementation Specialist and Automation Engineer with ∼3 years of hands-on experience designing, building, and deploying AI agents, Microsoft Copilots, and intelligent workflow automations across European technology companies. Combines deep technical execution (OpenAI, Microsoft Copilot Studio, Azure AI Services, Power Automate, n8n, TypeScript, Python) with a consulting mindset to translate operational business requirements into scalable, secure AI solutions. Proven record in establishing human-in-the-loop review guardrails, championing organizational AI adoption through coaching, and scaling production systems from 2,000 to over 4,500 active users.

CERTIFICATIONS

- **Microsoft Copilot Studio Agent Academy** – Building, customizing, and deploying conversational AI copilots and agentic workflows.
- **Microsoft: Introduction to Building AI Agents** – Autonomous agents, tool calling, and workflow orchestration.
- **Microsoft Power Automate** – Enterprise business process automation, cloud flows, and connector integrations.
- **Tray.ai Build Practitioner & Foundations** (September 2024) – Advanced enterprise integration and automation workflows.

TECHNICAL SKILLS & COMPETENCIES

- **Generative AI & Agents:** Microsoft Copilot, Copilot Studio, Azure AI Services, OpenAI / ChatGPT API, Anthropic Claude, AI Agents, Prompt Chaining, RAG Architectures, Human-in-the-Loop Validation.
- **Workflow Automation & Integration:** Microsoft Power Automate, n8n, Python, Playwright, REST API Design, Webhook Orchestration, CRM Integrations, Document Parsing (PDF, XLSX, EML to structured data).
- **Full-Stack Development & Cloud:** TypeScript, Next.js (App Router), React, Laravel 11 (PHP), Supabase, PostgreSQL (Neon), MySQL, Linux, Git/GitHub, Cloudflare, Oracle Cloud, GCP, Vercel.
- **Governance, Compliance & Consulting:** AI Governance & InfoSec Compliance, Security Guardrails, Stakeholder Management, User Coaching & Workshop Facilitation, Agile/Jira, Postman.

PROFESSIONAL EXPERIENCE

FlowSpace.co — **London, UK (Remote)**
Lead Developer & AI Solutions Engineer (Full-time, Freelance) — *Mar 2024 – Ongoing*

- Designed, built, and operated an AI data pipeline in production (Next.js, Python, Supabase) converting unstructured broker emails, PDFs, and spreadsheets into structured marketplace listings across 20+ commercial operators (e.g., WeWork UK&I, Sub800) and 1,000+ individual properties.
- Engineered intelligent AI support agents and automated lead routing systems, streamlining customer support operations and reducing response latency.
- Deployed an autonomous agent pipeline on GitHub Actions utilizing confidence scoring to auto-publish high-certainty records while escalating edge cases to human review.
- Architected a human-in-the-loop correction flywheel storing user diffs in PostgreSQL, continuously improving prompt accuracy and model extraction fidelity.
- Partnered with cross-functional business stakeholders to uncover operational bottlenecks, translating manual sales workflows into automated GTM and CRM pipelines.
- Led platform architectural migration from low-code to Next.js and Laravel, scaling the active platform user base from 2,000 to over 4,500 users.
- Shipped production API integrations with enterprise property management platforms (OfficeRnD, Nexudus) for automated real-time booking synchronization.
- *Tools & Technologies:* Claude Code, n8n, Microsoft Power Automate, Next.js, Laravel, TypeScript, Supabase, PostgreSQL, Jira, Postman.

Urlink **Barcelona, Spain (Remote)**
Project Manager & AI-Assisted Developer (Freelance) *Apr 2025 – Jul 2025*

- Led project scoping and technical execution for an enterprise platform, converting business requirements into production architectures using AI coding tools and Supabase.
- Built automated UI workflows and data handling logic, significantly accelerating MVP delivery and client validation cycles.
- Conducted stakeholder walkthroughs and training sessions to facilitate seamless client adoption of new AI-assisted tools.
- *Tools & Technologies:* TypeScript, Next.js, Supabase, bolt.new, GitHub.

UltraStrategy.com **France (Remote)**
AI Automation Developer (Collaborator) *Dec 2024 – May 2025*

- Built an automated document parsing pipeline using n8n and Eden AI APIs, extracting structured attributes from multi-format CVs and candidate profiles.
- Established automated validation rules and error-handling routines, ensuring compliance with data quality standards.
- *Tools & Technologies:* n8n, Eden AI, OpenAI API, Bubble.io.

Get2Germany.com **Berlin, Germany (Remote)**
Lead Developer & Automation Specialist (Part-time) *Jan 2024 – May 2024*

- Engineered AI-based automation tools to match international candidates with academic courses, internships, and job opportunities.
- Automated tracking and reporting pipelines through Google API integrations, reducing manual administrative overhead.
- *Tools & Technologies:* Bubble.io, n8n, Google APIs, Figma, Trello.

Clubee.com **Foetz, Luxembourg (Remote)**
Integration Developer & Quality Assurance (Full-time, Freelance) *Sep 2023 – Aug 2024*

- Delivered enterprise REST API integrations connecting backend services to client-facing web dashboards.
- Authored automated unit tests and rigorous QA protocols, ensuring stability and system reliability across release cycles.
- *Tools & Technologies:* Bubble.io, Postman, GitHub, REST APIs.

Qomodo & Tractionboard.co **Milan, Italy / Utrecht, Netherlands**
Developer & Automation Specialist *Aug 2023 – Jan 2025*

- Developed branch management dashboards and automated multi-location reporting for enterprise business clients.
- Integrated third-party communication and AI services (OpenAI, SendGrid) to automate operational workflows.
- *Tools & Technologies:* Bubble.io, Figma, SendGrid, ChatGPT API.

EDUCATION

Ca' Foscari University of Venice **Venice, Italy**
Bachelor's Degree in Philosophy, International Studies & Economics (Minor in Entrepreneurship) Oct 2020 – Jun 2024

- Interdisciplinary curriculum providing rigorous training in formal logic, analytical problem solving, economic analysis, and business informatics.

LANGUAGES & WORK AUTHORIZATION

- **Languages:** English (Professional / C2, fluent working proficiency), Hindi (Native), Italian (Beginner).
- **Work Authorization:** European Long-Term Residence Permit (unrestricted EU work rights, no visa sponsorship required). Open to relocation / hybrid work in Amadora/Lisbon, Portugal.
