Hiring Team – AI Enablement Organization
Teradyne
Odense, Denmark

Subject: Application for Technical Lead Manager, Forward Deployed Engineering (Odense / Regional Pod)

Dear Hiring Manager,

I am writing to express my strong interest in the Technical Lead Manager, Forward Deployed Engineering position at Teradyne. Teradyne's strategic initiative to accelerate AI-augmented workflows across its regional business units - bringing the same operational excellence and rigor to internal AI enablement that Teradyne is renowned for in automated semiconductor testing and industrial robotics - closely matches my background in forward-deployed AI engineering, workflow automation, and technical pod leadership.

Over the past three years, I have successfully transformed abstract business requirements into production-ready features across multiple European technology projects spanning the UK, France, Germany, Spain, Luxembourg, and Italy. Operating as a Lead Developer and AI Solutions Engineer, I have built and deployed LLM-powered applications, orchestrated complex workflow automations, and led engineering efforts from initial workflow diagnosis to scalable deployment.

During my tenure at FlowSpace (London, UK), I led engineering execution, managing developer pods and coordinating with cross-functional agency teams to migrate legacy systems to a modern Next.js and Laravel architecture. I engineered customer-facing AI agents, automated listing pipelines, and integrated third-party platforms (including Nexudus and Office RnD) and CRM systems. These automated workflows and product initiatives directly supported scaling active users from 2,000 to over 4,500 while significantly reducing manual support friction.

The mandate of Teradyne's Forward Deployed Engineering pod resonates strongly with my daily methodology. In forward-deployed engineering, technical leadership requires staying in the code: diagnosing business unit bottlenecks alongside operational stakeholders, scoping pragmatic AI interventions, and establishing clear metric baselines before committing engineering resources. I practice disciplined value tracking, discontinuing initiatives that fail to demonstrate tangible business impact. Furthermore, I prioritize establishing reusable architectural patterns ("build once, deploy many times") so that regional wins can scale across enterprise teams in collaboration with corporate IT, ensuring data security, compliance, and architectural governance.

My technical stack mirrors your requirements: I am certified in Microsoft Copilot Studio Agent Academy and Microsoft Power Automate, with direct experience connecting enterprise APIs with modern foundational models (OpenAI, Anthropic Claude). I build using AI-native development workflows with Claude Code, implement RAG architectures, and orchestrate agentic workflows (including n8n, LangChain/LangGraph concepts, and Model Context Protocol). This enables me to rapidly test hypotheses, prototype solutions alongside engineers, and harden them into reliable enterprise-grade systems.

I hold an Italian European Long-Term Residence Permit, granting me full authorization to work across Denmark and the European Union without visa sponsorship. Based in Venice, Italy, I have professional English proficiency (C2) and am fully available for regular regional travel to Odense and Teradyne business units across Europe as project milestones require.

I would welcome the opportunity to discuss how my hands-on technical leadership, forward-deployed engineering experience, and passion for pragmatic AI enablement can accelerate Teradyne's regional and global objectives. Thank you for your time and consideration.

Sincerely,

Prabhavit Gupta

I hereby authorize the processing of my personal data contained in this document in compliance with the European General Data Protection Regulation (EU Regulation 2016/679) and Italian Legislative Decree 196/2003, as modified by Legislative Decree 101/2018, for the purposes of recruitment and selection.

Prabhavit Gupta

Technical Lead Manager | Forward Deployed AI & Solutions Engineering

Venice, Italy | +39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit

Work Authorization: European Long-Term Residence Permit (No Sponsorship Required across EU)

PROFESSIONAL SUMMARY

Forward-Deployed Engineering Lead and Solutions Architect with extensive experience delivering production AI agents, automated workflow orchestration, and enterprise integrations across 8 European technology environments. Proven track record leading distributed developer pods (3–10 engineers and agency contributors), translating complex business unit bottlenecks into high-ROI software solutions, and establishing reusable architectural patterns. Certified in Microsoft Copilot Studio Agent Academy and Microsoft Power Automate, with deep hands-on expertise in AI-native engineering (Claude Code), agentic systems (MCP, RAG), and modern full-stack development (TypeScript, Next.js, Laravel). Experienced in establishing business outcome baselines, governing enterprise AI compliance, and scaling platforms from 2,000 to 4,500+ active users.

CORE TECHNICAL & LEADERSHIP COMPETENCIES

- **AI Platforms & Agentic Architectures:** Microsoft Copilot Studio (Certified), Agentic Workflows (MCP, LangGraph concepts), RAG Architectures, Prompt Engineering, OpenAI & Claude API Integration, Local LLMs (Ollama), Vector Retrieval, Eden AI.
- **Automation & Enterprise Integration:** Microsoft Power Automate (Certified), n8n Workflow Orchestration, RESTful API Integration (Nexudus, Office RnD, CRM systems, Google APIs), Tray.ai (Certified Practitioner).
- **Software Engineering & Stack:** Claude Code, TypeScript, Next.js, Laravel, Node.js, Supabase, PostgreSQL, REST/Webhooks, Playwright, Git/GitHub, CI/CD.
- **Technical Leadership & Delivery:** Forward Deployed Engineering, Solution Architecture ("Build Once, Deploy Many"), Business Unit Bottleneck Diagnosis, ROI Metric Baselines, Pod Leadership (3–10 engineers), Corporate IT/Security Governance.

PROFESSIONAL EXPERIENCE

FlowSpace.co — London, UK (Remote)
Lead Developer & Technical Pod Lead (Full-time, Freelance) — Mar 2024 – Ongoing

- Led a regional pod of developers and coordinated dotted-line external agency contributors, setting architectural standards, conducting code reviews, and steering technical delivery milestones.
- Scaled the platform active user base from 2,000 to over 4,500 users through iterative feature engineering, performance tuning, and automated operational pipelines.
- Architected and oversaw the complete platform migration from Bubble.io to a scalable Next.js and Laravel production stack, establishing modular patterns and eliminating technical debt.
- Designed and deployed customer support AI agents, streamlining inquiry triage and reducing first-response handling times.
- Integrated complex enterprise APIs (Nexudus, Office RnD) to automate space management and booking workflows, establishing idempotent synchronization mechanisms.
- Built resilient data scraping and LLM-assisted parsing pipelines to automate partner listing ingestion, expanding platform catalog inventory with minimal manual intervention.
- Orchestrated end-to-end GTM automation pipelines connecting CRM data capture, automated outbound sequences, and lead enrichment workflows.
- Established quantitative user engagement baselines to measure feature adoption, systematically deprecating low-value experiments to focus engineering resources on high-ROI initiatives.

Urlink — Barcelona, Spain (Remote)
Project Manager & Forward Deployed AI Developer (Freelance) — Apr 2025 – Jul 2025

- Operated in a forward-deployed capacity directly interfacing with business stakeholders to diagnose operational bottlenecks and translate client needs into production architectures.
- Built and shipped rapid MVP solutions using AI-native development workflows (Claude Code, bolt.new) alongside TypeScript, Supabase, and Netlify.
- Established reusable interface components and automation modules, decreasing time-to-delivery for follow-on client feature requests by over 40%.

UltraStrategy.com France (Remote)
AI Automation Solutions Engineer (Collaborator) Dec 2024 – May 2025

- Engineered high-throughput CV parsing and candidate profile extraction pipelines using n8n orchestration, Eden AI, and foundational LLM endpoints.
- Developed multi-tenant data normalization workflows across diverse user profiles, cutting manual review and operational overhead by more than 70%.

Qomodo Milan, Italy (Remote)
AI & Low-Code Solutions Developer (Collaborator) 2024 – Jan 2025

- Implemented enterprise branch management dashboards enabling multi-location oversight, translating complex Figma architectures into performant applications.
- Configured centralized business logic and role-based access control for distributed operational teams across multiple regional branches.

Get2Germany.com Berlin, Germany (Remote)
Lead Developer & Automation Specialist (Part-time) Jan 2024 – May 2024

- Architected AI-driven discovery and recommendation tools matching candidates to accredited courses, internships, and job openings.
- Integrated Google tracking APIs and optimized backend relational database schemas to enhance throughput and deliver real-time user engagement analytics.

Clubee.com Foetz, Luxembourg (Remote)
Solutions Developer & QA Engineer (Full-time, Freelance) Sep 2023 – Aug 2024

- Delivered end-to-end frontend integration with Clubee core REST APIs across member management, e-commerce shops, and federation dashboards.
- Implemented automated testing frameworks (Playwright, Postman) and quality assurance standards, driving down pre-release defect rates across key client portals.

Tractionboard.co Utrecht, Netherlands (Remote)
Low-Code Developer Intern Aug 2023 – Oct 2023

- Implemented early ChatGPT/OpenAI API integrations and SendGrid transactional messaging pipelines for user onboarding and lifecycle engagement.
- Conducted cross-browser responsive design implementation and structured user tracking analytics via Google Analytics 4.

EDUCATION

Ca' Foscari University of Venice Venice, Italy
Bachelor of Arts in Philosophy, International Studies & Economics Oct 2020 – Jun 2024
Minor in Entrepreneurship Venice, Italy

- Core disciplines: Analytical reasoning, international organizational frameworks, microeconomic modeling, entrepreneurial strategy.

PROFESSIONAL CERTIFICATIONS

- **Microsoft Copilot Studio Agent Academy** – Microsoft
- **Microsoft: Introduction to Building AI Agents** – Microsoft
- **Microsoft Power Automate Certification** – Microsoft
- **Tray.AI Build Practitioner** (Sep 2024) & **Tray.AI Build Foundations** – Tray.ai

LANGUAGES, AUTHORIZATION & MOBILITY

- **Languages:** English (Professional Working Proficiency / C2 Level), Hindi (Native), Italian (Beginner – Active Study).
- **Work Authorization:** Italian European Long-Term Residence Permit – Full legal authorization to work across Denmark and all EU Member States without visa sponsorship.

- **Regional Mobility:** Fully available for regular business travel across regional European hubs and Teradyne facilities (Odense, Denmark).
