UniCredit S.p.A.
AI Services and Delivery Chapter
Verona, Veneto, Italy

Motivation letter for Application for AI Engineer - Verona, Italy

Dear Hiring Manager,

I am writing to express my strong interest in the AI Engineer position within UniCredit's AI Services and Delivery team in Verona. As an AI Solutions and Automation Engineer based in Venice, I have followed UniCredit Group's pan-European digital transformation and commitment to scaling enterprise AI. UniCredit's focus on evolving a resilient, cloud-native AI Platform and engineering production-grade Agentic AI systems across business domains aligns directly with my practical background in LLM orchestration, production pipeline design, and robust API integrations.

Over the past three years, I have successfully transformed abstract business requirements into production-ready features across multiple European technology projects spanning different countries and sectors; from a sports management platform in Luxembourg to strategic consultant platforms in France and Spain.

Operating extensively as a freelance AI Solutions Developer, I engineered AI-based data parsing tools using n8n for UltraStrategy, automated complex workflows for Get2Germany, and executed rigorous quality assurance and API integrations for Clubee.

During my tenure at FlowSpace (based in London), I took over an already built system and managed it until its eventual migration to Next.js and Laravel. Alongside debugging the system, I also partook in GTM automations using their CRM. I engineered AI agents and automated data parsing tools that directly contributed to scaling the platform from 2,000 to over 4,500 active users.

My daily engineering workflow aligns directly with the core priorities of UniCredit's AI Services and Delivery chapter: I build and deploy production-grade Agentic AI pipelines using Python OOP, prompt chaining, and RAG architectures, connecting external enterprise APIs with foundational and open-source LLMs. At FlowSpace, I architected an end-to-end ingestion and extraction engine with bounded crawlers, multi-format document parsing, and an automated GitHub Actions agent pipeline featuring confidence-tiered auto-publishing and human-in-the-loop review. To guarantee production reliability and handle model non-determinism, I implemented a suite of 278 automated unit and integration tests alongside a feedback flywheel in PostgreSQL. Furthermore, I containerize workflows using Docker, deploy across cloud environments (GCP), and adhere strictly to software engineering best practices, microservices design, and robust API development.

I build extensively with modern AI coding assistants alongside low-code platforms and modern frameworks (TypeScript, Next.js, Laravel, Supabase) to rapidly test hypotheses and deploy MVP architectures. Recently, I oversaw a complex architectural migration from low-code infrastructure to a robust Next.js and Laravel stack, ensuring that rapid prototypes evolved successfully into highly scalable, reliable, and secure enterprise products.

I am also committed to continuously expanding my technical capabilities. I recently completed certifications in Microsoft Copilot Studio Agent Academy and AI agent orchestration, and I actively track evolving cloud-native MLOps tooling and open-source LLM deployments.

As a graduate of Ca' Foscari University, I have been living in Venice for 5 years, hold an Italian European Long-Term Residence Permit requiring no visa sponsorship anywhere in the EU, and have professional English proficiency (C2). Being based in Veneto, I am within direct reach of Verona and fully available for on-site collaboration, hybrid schedules, and business travel as project demands.

I would welcome the opportunity to discuss how my practical background in orchestrating enterprise AI systems, building resilient agentic pipelines, and bridging prototyping with production can immediately contribute to UniCredit's AI Platform and delivery goals.

Thank you for your time and consideration.

Sincerely,
Prabhavit Gupta

I hereby authorize the processing of my personal data contained in this document in compliance with the European General Data Protection Regulation (EU Regulation 2016/679) and Italian Legislative Decree 196/2003, as modified by Legislative Decree 101/2018, for the purposes of recruitment and selection.

Work Authorization: Italian EU Long-Term Residence Permit - Unrestricted EU Work Authorization, No Sponsorship Required

Professional Summary

AI Solutions and Automation Engineer with 3+ years of experience designing, implementing, and deploying production-grade AI systems, agentic workflows, and cloud-native data pipelines across European technology companies. Proven track record bridging rapid prototyping and enterprise-grade software delivery: architected multi-modal extraction pipelines, autonomous agent harnesses with human-in-the-loop review, and robust REST APIs using Python, TypeScript, and modern frameworks. Experienced in containerization (Docker), cloud services (Google Cloud Platform), automated testing for AI non-determinism (278+ automated tests), and scaling platforms from 2,000 to 4,500+ users. Based in Veneto, Italy, with full EU work authorization.

Technical Skills

- **AI & Agentic Systems:** Agentic AI Architecture, Multi-Agent Orchestration, RAG, Prompt Chaining & Evaluation, LLM Pipeline Engineering, Open-Source & Frontier LLMs (OpenAI, Claude), LangChain, Human-in-the-Loop Review Systems, Non-determinism Testing.
- **Software Engineering & Languages:** Python (OOP, API Design, Data Extraction), TypeScript, JavaScript, PHP (Laravel 11), SQL.
- **Cloud, DevOps & Containers:** Docker, Containerization, Kubernetes Fundamentals, Google Cloud Platform (GCP), Oracle Cloud, Linux/Bash Administration, CI/CD (GitHub Actions), PostgreSQL (Neon, Supabase), MySQL.
- **Architecture & Integration:** RESTful API Design & Implementation, Microservices Patterns, Web Crawling & Extraction Pipelines, Schema Design, Data Migration & ETL, Webhook Orchestration.
- **Testing & Quality Assurance:** Automated Testing (Unit, Integration, Scalability), 278-test Validation Suites, Playwright, Postman, Regression Testing.
- **Developer Tooling & Agile:** Claude Code, Git/GitHub, Jira, Agile/Scrum, Figma, n8n, Postman, ClickUp.

Professional Experience

FlowSpace.co — London, UK (Remote)
Lead Developer (Full-time, Freelance) — Mar 2024 - Present

- Architected and deployed an end-to-end production AI data extraction pipeline (listing.flowspace.co) converting messy, unstructured operator sources (PDF brochures, pitch decks, Excel sheets, emails) into validated marketplace listings.
- Built an autonomous agentic pipeline on GitHub Actions featuring confidence-tiered routing: automatically publishing high-confidence extractions and routing ambiguous cases to an internal human-in-the-loop review interface.
- Implemented a continuous training flywheel in PostgreSQL (Neon), capturing and diffing human edits against AI-generated drafts to systematically refine prompt chains and extraction accuracy.
- Engineered a bounded web crawler with file classification guards, anti-hijack mechanisms, and a comprehensive test suite of 278 automated unit and integration tests to ensure production reliability and prevent model hallucination.
- Oversaw platform migration from Bubble.io to a scalable Next.js and Laravel 11 stack (MySQL/PostgreSQL), driving active user growth from 2,000 to 4,500+.
- Designed and shipped production REST API integrations with commercial property systems (OfficeRnD, Nexudus) for automated booking synchronization.
- Containerized microservices using Docker, managed cloud deployments across GCP and Vercel, and maintained secure read-only production database access via SSH-tunneled bastions.
- Streamlined customer support and lead enrichment by developing conversational AI agents and CRM data ingestion automations.

Urlink — Barcelona, Spain (Remote)
Project Manager & AI-Assisted Developer (Freelance) — Apr 2025 - Jul 2025

- Architected and delivered a full-stack platform utilizing modern AI-native engineering tools (Claude Code, bolt.new), translating complex business requirements into modular cloud architecture.
- Implemented backend business logic, Supabase database schemas, authentication, and external API integrations, managing the complete product lifecycle from prototype to deployment.

UltraStrategy.com — France (Remote)
Automation Developer (Collaborator) — Dec 2024 - May 2025

- Engineered an enterprise CV parsing and data extraction tool using n8n, Eden AI, and LLM APIs to extract structured attributes from unstructured resumes.
- Built modular automation pipelines supporting multi-profile enterprise schemas with comprehensive validation and error recovery.

Qomodo Milan, Italy (Remote)
AI & Low-Code Developer (Collaborator) 2024 - Jan 2025

- Built enterprise branch-management dashboards and internal operational tooling connecting frontends with backend REST APIs.

Get2Germany.com Berlin, Germany (Remote)
Lead Developer & Automation Specialist (Part-time) Jan 2024 - May 2024

- Integrated Google Cloud APIs for platform analytics, performance monitoring, and backend data synchronization.
- Engineered AI-based matching tools to parse and recommend educational courses, internships, and job opportunities from dynamic feeds.
- Conducted relational database optimization, schema refinement, and automated workflow scheduling.

Clubee.com Foetz, Luxembourg (Remote)
Developer & Quality Assurance Specialist (Full-time, Freelance) Sep 2023 - Aug 2024

- Shipped RESTful API integrations across core sports federation management platforms.
- Designed and executed rigorous unit tests, integration test suites, and QA protocols for new features prior to production release.
- Developed internal tooling for federation dashboards, multi-tenant domain integration, and e-commerce modules.

Tractionboard.co Utrecht, Netherlands (Remote)
Developer Intern Aug 2023 - Oct 2023

- Integrated OpenAI APIs for automated text processing and content generation.
- Implemented transactional email workflows via SendGrid API and web event tracking via Google Analytics 4.

Education

Ca' Foscari University of Venice Venice, Italy
Bachelor's Degree in Philosophy, International Studies & Economics (Minor in Entrepreneurship) Oct 2020 - Jun 2024

Certifications

- Microsoft Copilot Studio Agent Academy
- Microsoft: Introduction to Building AI Agents
- Microsoft Power Automate
- Tray.ai Build Practitioner (September 2024) & Build Foundations

Visa, Languages & Location

- **Work Authorization:** Italian EU Long-Term Residence Permit (Unrestricted work authorization across Italy and EU, no visa sponsorship required).
- **Languages:** English (Professional - C2 level), Hindi (Native), Italian (Beginner - actively studying).
- **Location & Availability:** Based in Venice, Veneto (within 1 hour of Verona) - fully available for on-site/hybrid presence and EU business travel with 2 weeks' notice.
