Work Authorization: Italian EU Long-Term Residence Permit (Full authorization to work in Italy/EU without visa sponsorship)

Professional Summary

Full-Stack Software and Data/AI Engineer with 3 years of hands-on experience designing, deploying, and maintaining production web applications, automated data pipelines, and intelligent workflow systems across European technology organizations. Proven track record architecting cloud-first web platforms with Next.js, TypeScript, React, and Laravel, building resilient data ingestion pipelines with human-in-the-loop review, and developing AI agents in production. Strong adherent to defensive programming, agile engineering, automated testing, and CI/CD best practices. Based in Italy with full EU work authorization and professional English proficiency (C2), eager to contribute to the Digital FAO and Agro-informatics Division (CSI).

Technical Skills

- **Programming Languages:** TypeScript, JavaScript, Python, PHP, SQL, HTML5, CSS3, SCSS, Bash, C++ (fundamentals).
- **Web & Front-End Development:** Next.js (App Router), React, Tailwind CSS, Responsive UI Design, RESTful API consumption, State Management, Web Mapping integration (Leaflet, Map APIs).
- **Back-End & Software Engineering:** Node.js, Laravel 11, Python (FastAPI/Flask/automation scripts), REST API Architecture, Microservices, Defensive & Secure Programming, Web Protocols (HTTP/HTTPS, Webhooks).
- **Data Engineering & AI Integration:** Data Collection & Ingestion Pipelines, LLM Orchestration (OpenAI, Anthropic Claude APIs), Prompt Chaining, RAG Systems, Autonomous Agents, ETL Processing, Supabase, Neon, Data Quality Validation.
- **Databases & Cloud Infrastructure:** PostgreSQL, MySQL, Docker, AWS (S3, Athena, Glue fundamentals), Oracle Cloud VPS, Linux (Ubuntu/systemd/SSH), Caddy, Reverse Proxies, Cloudflare WAF.
- **DevOps, Agile & Practices:** Git, GitHub Actions (CI/CD pipelines & automated runners), Agile/Scrum Development, Automated Unit & Integration Testing, Version & Release Management.

Professional Experience

FlowSpace.co — London, UK (Remote)
Lead Developer / Software & AI Automation Engineer — Mar 2024 – Present

- Architected, deployed, and maintained full-stack web applications and data processing pipelines for a B2B coworking platform, supporting business growth from 2,000 to over 4,500 active users.
- Engineered flagship AI-powered listing and ingestion platform (`listing.flowspace.co`) using Next.js (App Router), TypeScript, Python, and Supabase; onboarded 20+ commercial operators (including WeWork UK&I and Sub800) covering 1,000+ individual property assets.
- Designed robust multi-source data ingestion pipelines: built bounded web crawlers with magic-byte file classification, batch Google Sheets/Drive ingestion, and multi-modal document extraction (PDF brochures, floor plans, email payloads).
- Developed autonomous multi-agent publishing workflows on GitHub Actions with confidence scoring to auto-publish high-confidence records while routing ambiguous cases to a bespoke human-in-the-loop validation UI.
- Built an active training flywheel: captured and diffed human corrections against automated outputs in PostgreSQL (Neon) to continuously refine model instructions and prevent data regressions.
- Led the architectural migration of core legacy systems to a modern Next.js and Laravel 11 (PHP/MySQL) stack, establishing relational schemas, resource mapping, soft-delete models, and automated backups without service downtime.
- Deployed customer support AI agents via n8n and LLM APIs, securely connecting live booking endpoints (OfficeRnD, Nexudus) with automated error handling and fallback logic.
- Implemented perimeter defense: diagnosed external bot floods and mitigated database strain through edge WAF rules, robots.txt policies, and SSH-tunneled bastion access.

UltraStrategy — Paris, France (Remote)
Freelance AI Solutions & Data Engineer — 2023 – 2024

- Designed and deployed automated data extraction and parsing pipelines using n8n, Eden AI, and custom REST integrations, converting unstructured multi-page PDF/Word documents into structured, schema-validated JSON.
- Implemented real-time webhook endpoints and automated data-cleaning routines to sync parsed records into core business systems with zero data duplication.
- Created automated validation suites and regression checks to ensure data accuracy and parsing consistency.

Clubee Luxembourg (Remote)
Software Integration & QA Engineer 2023 – 2024

- Developed and maintained third-party REST API integrations for an international sports club management platform across European clients.
- Authored end-to-end test suites, performed payload validation, and integrated defensive input-sanitization routines to protect platform integrity across distributed services.
- Collaborated in an agile cross-functional team, conducting code reviews and sprint planning.

Get2Germany Berlin, Germany (Remote)
Full-Stack & Automation Consultant 2023 – 2024

- Built automated data tracking, synchronization, and notification workflows utilizing Google APIs, webhooks, and modern scripting.
- Developed interactive AI-assisted search and discovery tools to match candidate profiles with opportunities based on criteria-filtering algorithms.

Urlink Barcelona, Spain (Remote)
Full-Stack Developer & Technical Product Lead 2023

- Architected and launched responsive web client applications from specification to MVP, applying rapid prototyping and AI-accelerated workflows.
- Managed backlog, user story breakdown, agile sprint cycles, and client feedback integration.

Education

Ca' Foscari University of Venice Venice, Italy
Bachelor of Arts in Philosophy, International Studies & Economics 2020 – 2024

- Recognized state university (IAU/UNESCO accredited). Interdisciplinary foundation in quantitative logic, international policy, systems analysis, and enterprise dynamics.

Certifications & Languages

- **Professional Certifications:** Microsoft Copilot Studio Agent Academy, Microsoft AI Agents, Microsoft Power Automate, Tray.ai Build Practitioner.
- **Languages:** English (Fluent / C2 level, professional working proficiency), Italian (Working proficiency / 5+ years Venice resident), Hindi (Native).
