Prabhavit Gupta

Senior Forward Deployed AI Engineer | Agentic AI & Full-Stack

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

I build and deploy production-grade agentic AI solutions and full-stack applications. At FlowSpace, I led the development of the AI layer, implementing document processing pipelines with LLM structured outputs and multi-agent support systems using retrieval-augmented generation (RAG). I excel as a technical partner to business stakeholders, taking ambitious AI visions from architecture through to secure, integrated production rollouts. I write clean, testable code in Python and TypeScript, and orchestrate complex enterprise integrations and CI/CD pipelines.

Skills

- **AI & LLMs in Production:** Agentic AI frameworks (LangGraph, n8n), Retrieval-Augmented Generation (RAG), LLM APIs (OpenAI, Claude), structured outputs, multi-agent orchestration, prompt engineering
- **Languages & Frameworks:** Python, TypeScript, Node.js, Express, React, Next.js, PostgreSQL, Redis, Supabase
- **Engineering & Delivery:** End-to-end AI lifecycle, REST API design, CI/CD, cloud deployment (AWS/Azure concepts), data modelling, asynchronous processing, ethical AI governance
- **Integrations:** Enterprise API integration, webhooks, CRM automations, system architecture

Experience

FlowSpace.co **Mar 2024 – Aug 2026**

Forward Deployed AI & Full-Stack Engineer (Full-time, Freelance) *London, UK (remote)*

- Partnered with stakeholders to design and deploy an AI layer that automated critical business workflows, scaling the platform capacity from 2,000 to over 4,500 active users.
- Built scalable agentic AI solutions, including support agents that resolve customer queries using RAG against live enterprise data, with fallback delegation to human operators.
- Delivered a multi-format document processing pipeline that extracts data from PDFs and web pages using LLM structured outputs, transforming unstructured data into production-ready listings.
- Orchestrated complex integrations via REST APIs and webhooks (including CRM platforms like Attio and Amplemarket) using n8n to ensure seamless data flow across business units.
- Managed the full application lifecycle, from system architecture to CI/CD deployment, ensuring reliability and security.

Get2Germany.com **Jan 2024 – May 2024**

Developer & Automation Specialist (Part-time) *Berlin, Germany*

- Developed automated data pipelines integrating Google APIs to process and organise high-volume domain data.
- Built AI-assisted workflow tools to match users with opportunities, optimizing the backend database for performance.

Clubee.com **Sep 2023 – Aug 2024**

Developer & QA (Full-time, Freelance) *Foetz, Luxembourg*

- Integrated internal APIs across the frontend architecture and led unit testing and QA to ensure robust production releases.

Freelance & Agentic AI Projects

- **UltraStrategy** (2024 – 2025): Deployed an enterprise CV-parsing agent using LLM data extraction, n8n orchestration, and Eden AI. Partnered directly with the client to define the AI capability and integrated it into a secure user portal.
- **Urlink** (2025): Acted as technical lead and AI developer, gathering requirements directly from the client and delivering a full-stack Next.js/Supabase platform with integrated user automations.

Certifications

Microsoft Copilot Studio Agent Academy • Tray.AI Build Practitioner (Sep 2024)

Education

Ca' Foscari University of Venice Oct 2020 – Jun 2024

BA Philosophy, International Studies & Economics (Minor: Entrepreneurship)

Work authorization: European Long Term Residence Permit (Italy), no sponsorship needed anywhere in the EU; available immediately. **Languages:** Hindi (native), English (professional), Italian (beginner).
