Profile

Senior Forward Deployed Engineer and Cloud Solutions Architect with deep expertise in enterprise customer delivery, AWS cloud architecture, and production-grade Generative AI implementations. Proven track record operating embedded with client stakeholders (CIOs, CTOs, VPs of Engineering) to translate complex business objectives into resilient AWS solutions. Hands-on expert in Infrastructure as Code (Terraform, AWS CDK), modern serverless/microservices patterns (Lambda, ECS, API Gateway, DynamoDB), legacy application migrations to AWS, and enterprise RAG/Bedrock systems that accelerate cloud adoption and deliver measurable ROI.

Core Competencies

- **AWS Cloud Architecture:** Core AWS (VPC, IAM, EC2, ECS, Lambda, S3, RDS, DynamoDB, CloudFront, Route 53), Microservices, Well-Architected Framework
- **Infrastructure as Code & DevOps:** Terraform, AWS CDK, CloudFormation, Docker, CI/CD Pipelines (GitHub Actions, GitLab CI, AWS CodePipeline)
- **AWS GenAI & Data Platforms:** Amazon Bedrock, SageMaker, RAG Pipelines, Vector Databases (pgvector, OpenSearch), Multi-Agent Systems
- **Software Development & Integrations:** TypeScript, Python, Node.js, Next.js, Laravel, REST/GraphQL APIs, Webhooks, PostgreSQL, Enterprise Systems
- **Forward Deployed Delivery:** Client Discovery, C-Level Alignment, Rapid POC Prototyping, Application Modernization, Cloud Enablement

Professional Experience

FlowSpace.co **London, UK (Remote)**

Lead Developer & Forward Deployed Cloud Engineer (Freelance) *Mar 2024 - Present*

- Led the cloud migration and application modernization from a legacy stack to Next.js and Laravel, scaling active users from 2,000 to over 4,500 with zero downtime.
- Architected and deployed an enterprise GenAI listing pipeline (Python, TypeScript, Claude/Bedrock APIs) ingesting multi-format unstructured brochures (PDFs, web, spreadsheets) with human-in-the-loop review, drafting 900+ production listings.
- Built resilient microservices utilizing AWS S3, Lambda, and relational databases for scalable background data processing, document parsing, and file storage.
- Engineered bidirectional enterprise integrations with OfficeRnD and Nexudus REST APIs, automating workspace reservations and billing synchronization.
- Embedded directly with client leadership and cross-functional teams to translate ambiguous business requirements into high-performing cloud architectures.

Urlink **Barcelona, Spain (Remote)**

Project Manager & Forward Deployed Developer (Freelance) *Apr 2025 - Jul 2025*

- Served as primary technical lead on client engagement, translating business logic into customized cloud applications using Next.js and Supabase.
- Designed automated client workflows and real-time database synchronizations, reducing deployment cycles and accelerating platform time-to-value.

UltraStrategy.com **France (Remote)**
Cloud & AI Automation Engineer (Collaborator) *Dec 2024 - May 2025*

- Deployed an automated multi-profile document parsing and ingestion engine using n8n and Eden AI, structuring unstructured files into validated JSON records.
- Built automated data pipelines and error recovery workflows to reliably ingest candidate records into downstream enterprise databases.

Get2Germany.com **Berlin, Germany (Remote)**
Lead Developer & Automation Specialist (Part-time) *Jan 2024 - May 2024*

- Developed automated data collection pipelines integrating Google Cloud APIs, optimizing database queries and data synchronization performance.
- Implemented custom AI-powered recommendation logic to match candidates with educational and career opportunities.

Clubee.com **Foetz, Luxembourg (Remote)**
Full-Stack Developer & QA Engineer (Freelance) *Sep 2023 - Aug 2024*

- Engineered comprehensive REST API integrations across client-facing modules, federation dashboards, and e-commerce subsystems.
- Enforced production reliability through automated end-to-end testing (Playwright) and API contract testing (Postman), minimizing deployment regressions.

Qomodo **Milan, Italy**
Solutions Developer (Collaborator) *2024 - Jan 2025*

Built an enterprise branch-management platform and operational dashboard according to client design specifications, enabling multi-location corporate administration.

Technical Solutions & Accelerators

- **Enterprise Multi-Modal RAG Ingestion Engine** (github.com/prab-gupta/llm-doc-parser): Event-driven framework using AWS S3, pgvector/OpenSearch, and Bedrock/Claude APIs; implemented schema-validated parsing and human-in-the-loop review.
- **Automated Cloud Infrastructure Accelerators**: Reusable Terraform and CDK configuration modules for rapid staging of serverless microservices, secure VPC networking, and containerized task orchestration on AWS.

Education

Ca' Foscari University of Venice **Venice, Italy**
BA Philosophy, International Studies & Economics (Minor: Entrepreneurship) *Oct 2020 - Jun 2024*

Certifications & Languages

- **Certifications & Training:** Microsoft Copilot Studio Agent Academy, Introduction to Building AI Agents, Microsoft Power Automate, Tray.AI Build Practitioner; AWS Well-Architected Framework & Cloud Architecture Principles.
- **Work Authorization & Languages:** European Long Term Residence Permit (Italy; unrestricted EU work rights, no sponsorship needed). English (Fluent C1/C2), Hindi (Native), Italian (Conversational).
