Profile

Full Stack & AI Automation Engineer with deep expertise in designing, building, and deploying production-ready AI capabilities. Proven track record of delivering agentic solutions, prompt orchestration, and robust automated workflows. Adept at backend and full-stack software engineering (TypeScript, Python, Node.js) and integrating GenAI solutions with enterprise systems to accelerate time-to-value. Committed to performance optimization, monitoring, and scalable delivery across the end-to-end AI lifecycle.

Core Competencies

- **AI & Automation:** GenAI solutions, RAG, prompt orchestration, tool/function calling, agent frameworks
- **Software Engineering:** TypeScript, Python, Node.js, Angular, Next.js, HTML/CSS, REST APIs
- **Enterprise Integration:** API integration, event queues, ETL/ELT data pipelines, identity & security controls
- **Operations & Delivery:** Production deployments, monitoring, logging, incident triage, performance & cost optimization

Professional Experience

FlowSpace.co **London, UK (Remote)**

Lead Full Stack Developer (Freelance) *Mar 2024 - Present*

- Architected and deployed enterprise software solutions (TypeScript, Node.js), engineering complex backend integrations with external CRM and booking systems via robust APIs and ETL pipelines.
- Designed GenAI-driven workflows and agentic capabilities for complex data extraction and process automation, securely integrating them into production environments.
- Operated with a focus on performance and cost optimization, scaling the platform to support 4,500+ active users while maintaining system reliability through robust monitoring and logging.
- Partnered closely with stakeholders and product owners to translate complex business requirements into scalable AI-integrated features across the end-to-end lifecycle.

Urlink **Barcelona, Spain**

Project Manager & Full Stack Developer (Freelance) *Apr 2025 - Jul 2025*

- Delivered a customized full-stack platform leveraging modern databases and scalable backend logic to execute complex client-driven automations.
- Integrated third-party APIs and custom tooling, establishing comprehensive identity and security controls within the data flow.

UltraStrategy.com **France**

Automation Engineer (Collaborator) *Dec 2024 - May 2025*

- Designed and deployed robust data processing pipelines and automated extraction tools to serve a multi-profile user platform, integrating seamlessly into the enterprise ecosystem.
- Utilized modern frameworks to coordinate agentic workflows, orchestrating prompts and tool calling for reliable automated insights.

Get2Germany.com **Berlin, Germany**

Lead Developer & Automation Specialist *Jan 2024 - May 2024*

- Built external API integrations and automated tools utilizing modern backend logic to streamline discovery pipelines, directly improving business operations and reducing manual overhead.

Clubee.com **Foetz, Luxembourg**

Full-Stack Developer & QA (Freelance) *Sep 2023 - Aug 2024*

- Implemented REST API integrations across the frontend, developed core domain tools, and enforced production-grade quality through rigorous automated testing, monitoring, and incident triage.

Education

Ca' Foscari University of Venice **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor in Entrepreneurship

Certifications & Languages

Work Authorization: European Long Term Residence Permit (Italy). Remote/Contract ready.
Languages: English (Fluent/Professional), Hindi (Native), Italian (Beginner).
