Software engineer specializing in backend automation, API architecture, and building event-driven workflows for customer service. Experienced in deploying LLM-powered agents and n8n pipelines that handle nuanced customer interactions and automate self-service flows. Hands-on with Python, REST APIs, and integrating third-party systems, bridging the gap between product engineering and customer success. Proven ability to own the entire automation lifecycle and deliver reliable, maintainable systems at scale.

Core Competencies

- **Backend & Automation:** Python, TypeScript, n8n, workflow automation, custom data pipelines, script development
- **AI Orchestration & Tooling:** LLM APIs (Claude, OpenAI), agentic workflows, Model Context Protocol (MCP), RAG
- **API & Integrations:** REST/GraphQL APIs, third-party system integrations (billing, CRM), webhook integrations, PostgreSQL
- **Cloud & Infrastructure:** GCP, AWS, Docker, CI/CD pipelines, Kubernetes, Terraform basics, planned cluster operations

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & AI Engineer (Freelance) *Mar 2024 - Aug 2026*

- Embedded AI into the core product by shipping LLM-powered customer support agents that query live database records and intelligently escalate complex tickets to human teams in real time.
- Built a custom automation pipeline using Python, TypeScript, and n8n to process structured data from client documents, replacing manual data entry workflows and drafting over 900 verified listings.
- Architected robust API integrations with third-party billing and CRM providers to automate self-service flows, external bookings, and customer notifications.
- Migrated the core live marketplace off a legacy stack to a modern Next.js/Laravel architecture, ensuring highly reliable backend systems and scaling active users from 2,000 to 4,500+.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Integrated Google APIs and built custom event-driven tools in n8n to automate data aggregation and processing, significantly reducing manual engineering work.
- Translated complex aggregation needs into reliable automated pipelines, providing actionable insights directly to founders.

Clubee.com **Foetz, Luxembourg**

Developer & QA *Sep 2023 - Aug 2024*

- Integrated the core REST API across the frontend, executing rigorous testing to ensure reliable, maintainable automation for customer deployments.

Tractionboard.co **Utrecht, Netherlands**

Developer (Internship) *Aug 2023 - Oct 2023*

- Integrated OpenAI and SendGrid APIs, automating email notifications and translating business logic into responsive workflows.

Independent Projects

Urlink

Project Manager & AI-Assisted Developer *2025 - 2025*

Managed direct client requirements, developing self-service automation flows and shipping integrations using Next.js and Supabase.

UltraStrategy

AI Automation Developer *2024 - 2025*

Built a custom AI-driven CV-parsing solution via LLM data extraction for client environments, leveraging n8n and Eden AI for workflow automation.

Qomodo

AI Developer *2024 - 2025*

Built an intuitive dashboard for companies to manage and monitor branch operations based on provided design specs.

Certifications

- Microsoft Copilot Studio Agent Academy
- Microsoft: Introduction to building AI agents
- Microsoft Power Automate
- Tray.AI Build Practitioner (Sep 2024)

Education

Ca' Foscari University of Venice **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor: Entrepreneurship.
