Prabhavit Gupta

Founding Forward Deployed Engineer

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (Open to relocation to Seoul)

Summary

Forward deployed AI engineer who embeds with customers to turn AI ambition into working production systems. At FlowSpace, I owned the full lifecycle from customer requirements to production: mapping workflows, architecting solutions, building rapid prototypes, and deploying robust multi-step LLM agents. I specialize in integrating AI agents into B2B web products and proprietary APIs, debugging complex data flows, and taking PoCs to production under enterprise constraints like schema validation and human-in-the-loop reviews. I am eager to relocate to Seoul to build customer-specific integrations for Harper and drive agent adoption.

Skills

- **AI & Agentic Systems:** LLMs (Anthropic, OpenAI), prompt engineering, tool use/function calling, structured output parsing, multi-step agent orchestration, RAG pipelines, evaluation frameworks, human-in-the-loop review.
- **Backend & Integrations:** Python, TypeScript, React/Next.js, REST API design, enterprise integrations (CRM, payment platforms, booking systems), webhooks, asynchronous jobs, data extraction pipelines.
- **Customer Deployment:** End-to-end project ownership, workflow mapping, prioritizing specs, rapid prototyping, PoC to production, debugging customer data flows, managing enterprise constraints.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Owned end-to-end customer projects: mapped workflows, defined success criteria, and built multi-step LLM agents with tool use to ingest arbitrary customer documents (PDFs, web pages, spreadsheets).
- Built integrations against customer APIs (OfficeRnD, Nexudus) and CRM pipelines (Attio, Amplemarket), debugging data flows between AI agents and third-party B2B SaaS platforms.
- Took PoCs to production under enterprise constraints by designing human-in-the-loop workflows with schema validation, approval gates, and escalation paths to guarantee data accuracy before deployment.
- Built RAG-backed support agents that answered user queries against live platform data, implementing confidence scoring and fallback mechanisms for low-confidence responses.

Get2Germany.com **Jan 2024 – May 2024**
Developer & Automation Specialist (Part-time) *Berlin, Germany*

- Integrated Google APIs and built AI automation pipelines (n8n) to streamline course, internship, and job discovery for users.

Clubee.com **Sep 2023 – Aug 2024**
Developer & QA (Full-time, Freelance) *Foetz, Luxembourg*

- Integrated the Clubee API across the frontend, built dashboard tools for federation management, and led QA testing to ensure zero-downtime releases.

Freelance Projects

- **Urlink** (2025), Project Manager & AI Developer. Gathered requirements directly from stakeholders, built a Next.js/Supabase platform, and shipped client-driven automations.
- **UltraStrategy** (2024–2025), AI Automation Developer. Built an LLM data extraction pipeline for CV parsing using n8n and Eden AI.

Education

Ca' Foscari University of Venice Oct 2020 – Jun 2024
BA Philosophy, International Studies & Economics (Minor: Entrepreneurship)

Work authorization: European Long Term Residence Permit (Italy); open to relocation to Seoul. **Languages:** English (professional), Hindi (native), Italian (beginner).
