Venice, Italy (Open to relocation / Hybrid in London)

PROFILE

Software Engineer specializing in AI integrations, agentic workflows, and full-stack development with a strong track record of deploying robust LLM-based solutions into production. Experienced in working directly with clients to map requirements into technical implementations, bridging the gap between product capabilities and end-user needs. Brings hands-on expertise in Python, TypeScript, and RAG architectures, with a proven ability to scale platforms and deliver reliable automation in complex domains.

CORE COMPETENCIES & SKILLS

- **Languages & Frameworks:** TypeScript, Python, JavaScript, Next.js, Node.js, Laravel (PHP)
- **AI & LLMs:** Agentic workflows in production, RAG, tool use, LLM data extraction, prompt engineering, Claude/OpenAI APIs, Eden AI
- **Data & Infrastructure:** Postgres, Supabase, REST APIs, webhooks, cloud platforms
- **Client-Facing Engineering:** Technical requirement scoping, end-to-end project management, stakeholder communication, resolving complex customer issues

PROFESSIONAL EXPERIENCE

Lead Developer (AI & Full-Stack) **Mar 2024 - Aug 2026**
FlowSpace *London, UK (Remote)*

- Engineered and deployed a production AI listing bot that processes multi-format documents (PDFs, spreadsheets, images) to automatically generate structured data and draft platform listings with a human-in-the-loop review system.
- Built and maintained AI support agents that query live platform data to answer customer inquiries, featuring confidence-based escalation to human operators.
- Led the end-to-end technical migration of the platform from a legacy stack to a Next.js and Laravel architecture, scaling the user base from 2,000 to over 4,500 active users.
- Acted as the technical bridge between internal teams, external agencies, and clients, ensuring seamless integration of third-party APIs (OfficeRnD, Nexudus) and resolving complex customer-facing issues.

Project Manager & AI-Assisted Developer **Apr 2025 - Jul 2025**
Urlink *Barcelona, Spain (Remote)*

- Managed end-to-end client requirements and translated them into technical logic for the platform.
- Built the core platform using Next.js and Supabase, implementing client-driven automations.

AI Automation Developer **Dec 2024 - May 2025**
UltraStrategy *France (Remote)*

- Developed an LLM-powered data extraction pipeline for automated CV parsing using n8n and Eden AI.
- Built platform features capable of serving tailored experiences to distinct user profiles.

Developer & Automation Specialist **Jan 2024 - May 2024**
Get2Germany *Berlin, Germany (Remote)*

- Integrated Google APIs and developed AI tools to streamline the discovery of courses, internships, and job opportunities.

Developer & QA **Sep 2023 - Aug 2024**
Clubee *Foetz, Luxembourg (Remote)*

- Integrated internal APIs across the frontend architecture and built domain-integration tools.
- Conducted unit testing and quality assurance across platform features.

EDUCATION

Ca' Foscari University of Venice **Oct 2020 - Jun 2024**
B.A. Philosophy, International Studies & Economics (Minor: Entrepreneurship)

LANGUAGES

- **English:** Fluent (C2)
- **Italian:** Professional
